## Chapter 5: Folder – Carbon Footprint

### Report: Air Carbon Footprint - Detail

Available to:  Analysis  Intelligence  
 Uses:  Expense Data  Travel / TripLink Data

This report tracks carbon emissions by traveler for air segments.

If the duration of the flight is 4 hours or longer, it is considered a long-haul flight. If the flight is less than 4 hours, it is considered a short-haul flight.

## Report: Air Carbon Footprint - Summary

Available to:  Analysis  Intelligence  
 Uses:  Expense Data  Travel / TripLink Data

This report provides a snapshot of company carbon footprint by different measurements.

If the duration of the flight is 4 hours or longer, it is considered a long-haul flight. If the flight is less than 4 hours, it is considered a short-haul flight.

 Uses:  Expense Data  Travel / TripLink Data

This report provides detailed carbon footprint information for your organization's business car travel. Information from the report is summarized and visualized in the **Business Car Carbon Footprint Insights** section of the Sustainability Dashboard.

### Report Prompts

On the **Prompts** page, the Car CO2E Rate is prefilled according to the Greenhouse Gas Reporting rates. The rate on the **Prompts** page can be modified to accommodate your organization’s carbon dioxide equivalent (CO<sub>2</sub>e) standards.

## Dashboard: Sustainability Dashboard

Available to:  Analysis  Intelligence  
Uses:  Expense Data  Travel / TripLink Data

### Overview

The Sustainability Dashboard can help your organization analyze air and rail bookings in the current year as compared to the prior year, as well as company and personal car mileage information.

The Sustainability Dashboard can assist with reducing your organization's overall travel carbon footprint by helping to identify opportunities for rail alternatives and identifying the number of rail and air segments traveled between selected city pairs (origin and destination). Incorporating company car and personal car mileage spend categories into the equation, the dashboard provides an organization with insight into the impact of air, rail, and car mileage.

By establishing a baseline carbon footprint, your organization can more easily determine how to reduce or eliminate excess travel, budget for actionable climate solutions, and mitigate emissions contributions.

There are five detail reports associated with the Sustainability Dashboard available for Intelligence clients:

- Air Travel Carbon Footprint Insight - Details
- Business Car Carbon Footprint Insight - Details
- Business Same Day Trips - Details
- Rail Business Travel Emission - Details
- Total Trips – Details

The detail reports provide an in-depth look at the information summarized on the Sustainability Dashboard.

## Dashboard Prompts

On the Sustainability Dashboard's prompts page, all rates are prefilled according to the Greenhouse Gas Reporting rates. The rates on the prompts page can be modified to accommodate your organization's carbon dioxide equivalent (CO<sub>2e</sub>) standards.
