Company Info

Section 1: Permissions

A company administrator may or may not have the correct permissions to use this feature. The administrator may have limited permissions, for example, they can affect only certain groups and/or use only certain options (view but not create or edit).

If a company administrator needs to use this feature and does not have the proper permissions, they should contact the company's Concur administrator.

In addition, the administrator should be aware that some of the tasks described in this guide can be completed only by Concur. In this case, the client must initiate a service request with Concur Client Support.

Section 2: Overview

The Company Info feature can be used to broadcast information via the Company Notes section of the home page. This information can include links to other applications (such as a company intranet site or local traffic), "How To" information for Concur users, or links to external documents.

The admin can configure a message to be broadcast company-wide or a message can be restricted to one or more groups – targeting the appropriate audience for each message.

What the User Sees

The message displays in the **Company Notes** area of the home page. The user sees the messages configured for their group and the messages that are configured to be seen company-wide.

Section 3: Procedures

The screenshot displays the Concur user interface. At the top, there is a navigation bar with tabs for Requests, Travel, Expense, Invoice, Approvals, Reporting, and App Center. The main content area is divided into several sections: TRIP SEARCH (with Air/Rail Search options and a search button), ALERTS (with a notification about e-receipts), COMPANY NOTES (highlighted with a red box, containing information about Avis Preferred Service and urgent assistance), and MY TASKS (with a table of tasks and their counts).
