	Other	SAP Concur Cloud Platform Strategy	

Overview

SAP Concur is currently migrating TMCs to new Amazon Web Services (AWS) data centers, a process which affects TMC workflows. SAP will first move TMCs to the new data centers, followed over time by their customers. TMCs will therefore experience a period of time where their customer base is split over the current data centers and the new AWS data centers.

USER/CUSTOMER BENEFIT

We are migrating from a private platform, where all equipment is owned by SAP Concur solutions, to a third-party cloud platform. This will provide stronger security, improved performance and stability, and faster innovation for our customers.

End-User Experience

End users should see no difference as the migration is carried out, however, TMCs may be required to modify their customer management processes. TMCs should refer to the [Client Fact Sheet - TMC AWS Migration](#) for up to date details on changes to their workflows.

Configuration for Professional and Standard Travel

This feature is enabled by default. There are no configuration steps.

For more information, refer to the [Client Fact Sheet - TMC AWS Migration](#) and the [SAP Concur Cloud Platform Strategy](#). To locate, refer to *Additional Release Notes and Other Technical Documentation* in these release notes.

XML Sync Settings Removed from Company Travel Configuration

Prof	Stan	← ← Edition	
X	X	On: Impacts end users who use this feature/vendor; no configuration/setup by agency/admin; cannot be turned OFF (example: new icons or rate display, new Amtrak feature)	
		Available for use: No impact to end users unless/until configuration/setup by agency/admin (described below) (example: new rule, new Travelfusion airline)

Overview

The XML Profile Sync, which is used to synchronize Concur Travel profile data with TMC partners, will no longer be available after June 2022. Settings related to XML Profile Sync are being removed from Company Travel configuration.

USER/CUSTOMER BENEFIT

Users will no longer see these settings in the Company Travel configuration, as the XML synchronization is no longer available.

What the User Sees

The following UI sections will be removed:

- XML Sync Authorization

XML Sync Authorization - used for syncing travel profiles via web service; leave blank to disable
PersonCode and PersonDBC should contain the *name* of the custom fields that should map to those fields in the XML sync.

Company Code	<input type="text"/>	Login Type	None - Cannot add new users
User	<input type="text"/>	Login Suffix/Validation	<input type="text"/>
Password	<input type="text"/>	Password Type	<input type="text"/>
PersonCode (Custom Field)	<input type="text"/>	Password Prefix/Value	<input type="text"/>
PersonDBC (Custom Field)	<input type="text"/>		
ClientQuestions (Custom Fields List)	<input type="text"/>		
Sync to GDS Sync Option*	<input type="text"/>	(Clear to disable automatic sync to GDS)	

Send New Users on Changes Retrieve
 Limit Sync to Profiles for This Config
 Automatically Populate Profile Last Updated Date (recommended for customers who have the Concur travel profile hidden)
 Use work/home address as default for credit cards

- TripSource: ProfileManager

<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	
Template Id	Target URL			
<input type="text"/>	EMEA Commercial			

- Tramada

Tramada

TramadaAgency	TramadaCompany	TramadaAuth	TramadaClassic
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

Configuration for Professional and Standard Travel

The feature is enabled by default. There are no configuration steps.

Email Notifications

New Email Address For Travel Approvals (AWS Environment)

Overview

The email addresses from which email notifications are sent to Concur Travel approvers has been updated in the AWS environment. Clients who are implemented in or migrated to the AWS environment will receive Concur Travel approval notifications from the following addresses:

US Datacenter:

- TravelWizardApprovalsUS2@concur solutions.com

EU Datacenter:

- TravelWizardApprovalsEU2@concur solutions.com

NOTE: This change does not impact other email notification types, such as "Reminder of upcoming travel" and "Ticketed confirmation". Those notifications will continue to be sent from TravelWizard@concur solutions.com.

In addition, clients who have not been migrated to the AWS environment will continue to receive approval emails from TravelWizard@concur solutions.com.

BUSINESS PURPOSE / CLIENT BENEFIT

This change makes identifying the source and purpose of the approval email notification easier.

Configuration / Feature Activation

This change occurred automatically. If your company uses email allow lists to restrict email traffic, this email address might need to be added to your allow list.

NOTE: If your company uses email allow lists, SAP recommends adding *.concur solutions.com to your allow list. Adding *.concur solutions.com ensures that all emails coming from the *.concur solutions.com domain are allowed and prevents the need for updates if an email username changes or when new email addresses from *.concur solutions.com are added.

For more information about the SAP Concur Migration to Cloud Platform in AWS, refer to the [SAP Concur Cloud Platform Strategy FAQ](#).

Overview

As announced in the Release Notes of December 2021, JetBlue Airways opted to file all seats for all fare products as “chargeable”, in all GDSs. For some fare products, seats were listed with a charge of zero dollars, effectively providing the seat allocation free of charge. For other fare products, a fee was required.

This change led to a number of confusing scenarios, such as:

- A seat map display that implied a fee would be charged for a seat, when in fact it was free of charge for most of the fare products.
- Some GDSs failing to confirm the user’s seat selection.
- Some GDSs displaying a message to users that indicated a seat would automatically be reserved when, in fact, no seat had been reserved.

Because of this change, as of the December 2021 release, Concur Travel opted to no longer provide seat information for JetBlue. Instead, Concur Travel informed users that they had the option to reserve seats directly at JetBlue’s website.

As of May 15, JetBlue has reversed their decision and changed their seat map logic back to the original settings to resolve the above-mentioned problems caused by the previous change.

As of May 25, based on the changes from JetBlue, Concur Travel has again displayed the full seat map. This applies to the entire booking flow, including the **Search** results page.

The seat map displayed on the **Search** results page may differ from subsequent pages, depending on the selected fare product. On the **Search** results page, the seats are shown at the flight level, not the fare level. On subsequent pages, the seat map reflects the seats availability for the chosen fare product.

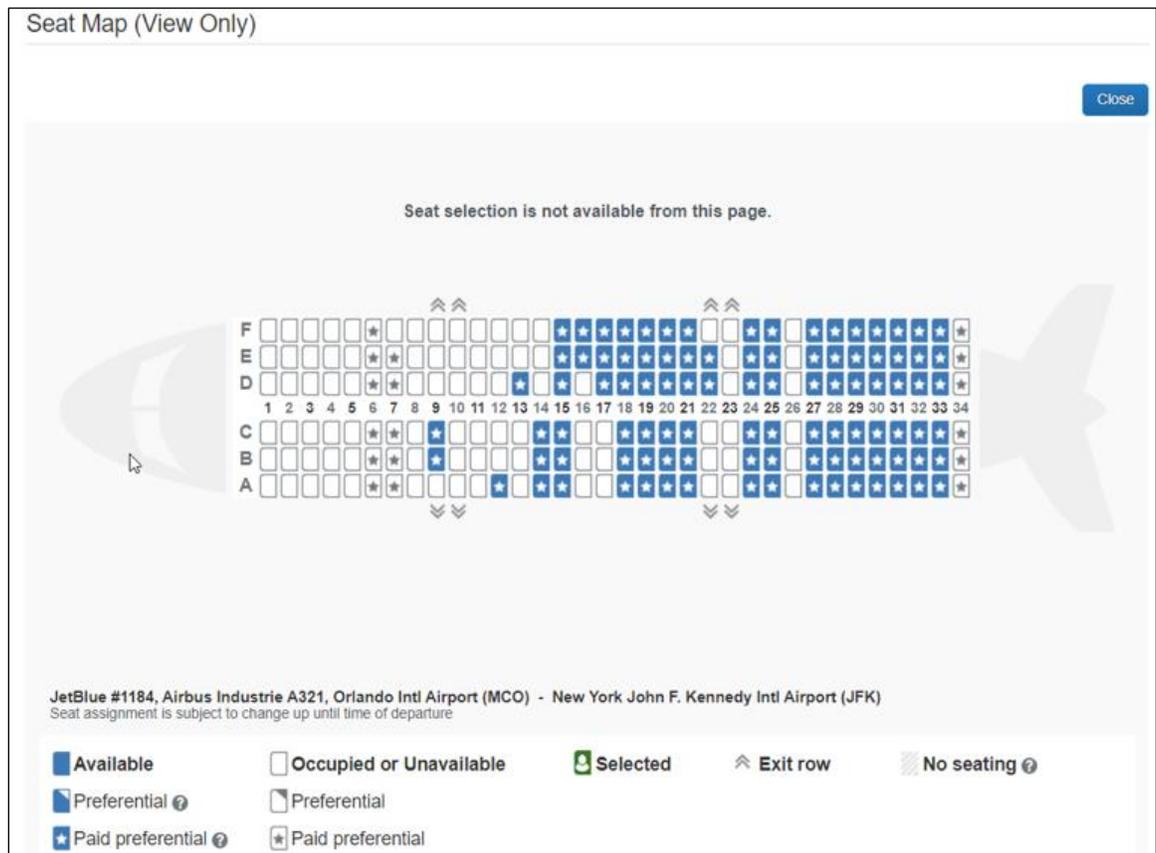

If a specific seat has not been selected by the user, Concur Travel sends a generic seat request to the GDS. This is done to minimize scenarios of denied boarding in cases where the airline has oversold the flight. Concur Travel will continue to do this for all airlines. Customers may wish to consult with their travel management company to confirm seat reservation handling in case a seat charge may be applicable.

USER/CUSTOMER BENEFIT

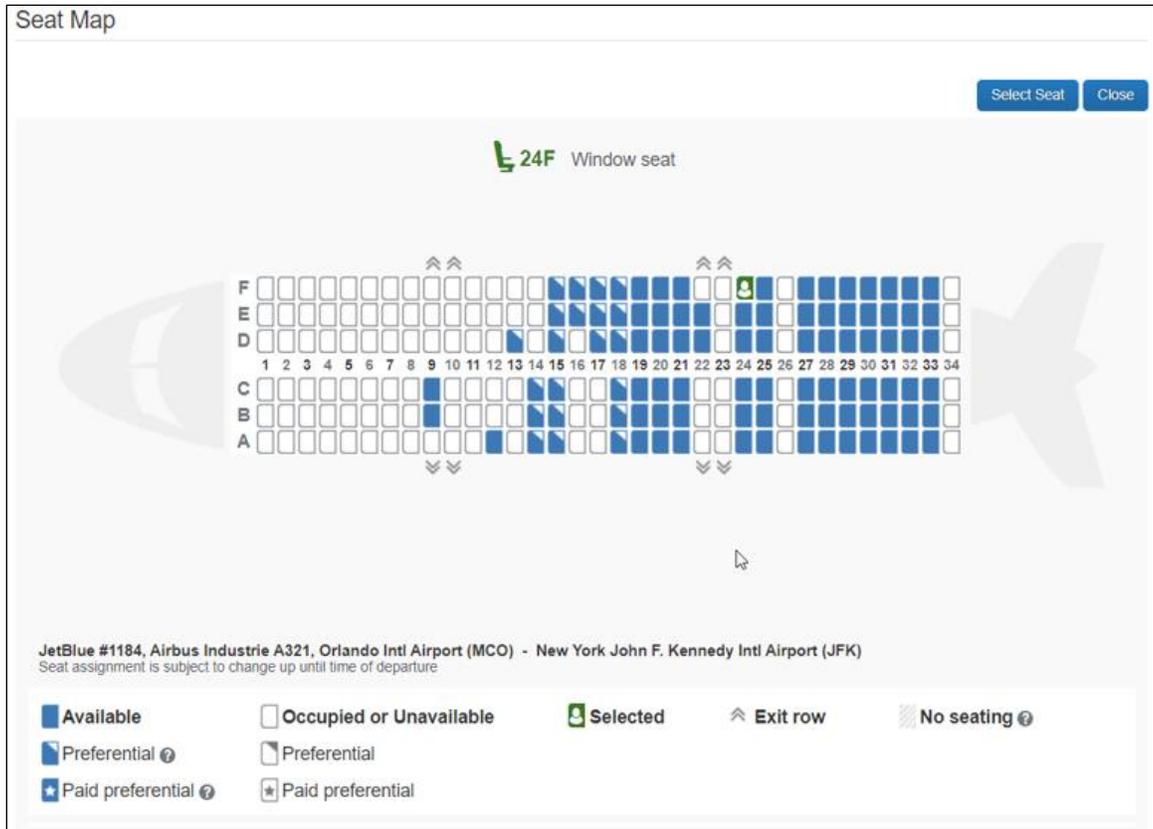

This change provides users full visibility of available seats, allowing them to select seats while booking a flight in Concur Travel.

User Experience

No changes have been made to the way Concur Travel displays seat maps in flight search results.

On the **Review and Reserve** and **Travel Details** pages, or after reserving a flight on the **Itinerary Details** page, users will be presented with the seat map corresponding to the chosen fare product. Depending on the GDS, user are able to select seats from either the **Review and Reserve** page, or from the **Confirmation** page after flights are reserved.

Configuration for Professional and Standard Travel

This feature is enabled by default. There are no configuration steps.

For more information, refer to the [Seat Maps Fact Sheet](#). To locate, refer to *Additional Release Notes and Other Technical Documentation* in these release notes.

Planned Changes

The items in this section are targeted for future releases. SAP Concur solutions reserves the right to postpone implementation of – or completely remove – any enhancement or change mentioned here.

NOTE: The planned changes listed in this document are specific to this product. For information about planned site-wide or shared changes that might impact your SAP Concur solutions, refer to the [Shared Changes Release Notes](#).

There are no Planned Changes included in this release.

Client Notifications

Accessibility

Accessibility Updates

SAP implements changes to better meet current Web Content Accessibility Guidelines (WCAG). Information about accessibility-related changes made to SAP Concur solutions is published on a quarterly basis. You can review the quarterly updates on the [Accessibility Updates](#) page.

Subprocessors

SAP Concur Non-Affiliated Subprocessors

The list of non-affiliated subprocessors is available from the SAP Sub-processors / Data Transfer Factsheets page.

▶ **To access the SAP Concur Sub-processors List:**

1. Click the following link to navigate to the *SAP Sub-processors / Data Transfer Factsheets* page:
[SAP Sub-processors / Data Transfer Factsheets](#)
2. Sign in to the SAP Support Portal using your Support User ID (S-user) and password.

NOTE: SAP customers must sign in to the SAP Support Portal using their Support User ID (S-user) and password. For information about S-User IDs, refer to [Your New Support User ID \(S-user\)](#).

3. On the *SAP Sub-processors / Data Transfer Factsheets* page, type "Concur" in the **Search** field.
4. In the **Title** column, click **SAP Concur Sub-processors List**.

If you have questions or comments, please reach out to: Privacy-Request@Concur.com

Supported Browsers

Supported Browsers and Changes to Support

For information about supported browsers and planned changes to supported browsers, refer to the [Concur Travel & Expense Supported Configurations](#) guide.

When changes to browser support are planned, information about those changes will also appear in the [Shared Changes Release Notes](#).

Additional Release Notes and Other Technical Documentation

Online Help

Any user can access release notes, setup guides, user guides, admin summaries, monthly browser certifications, supported configurations, and other resources via online Help or directly on the SAP Help Portal.

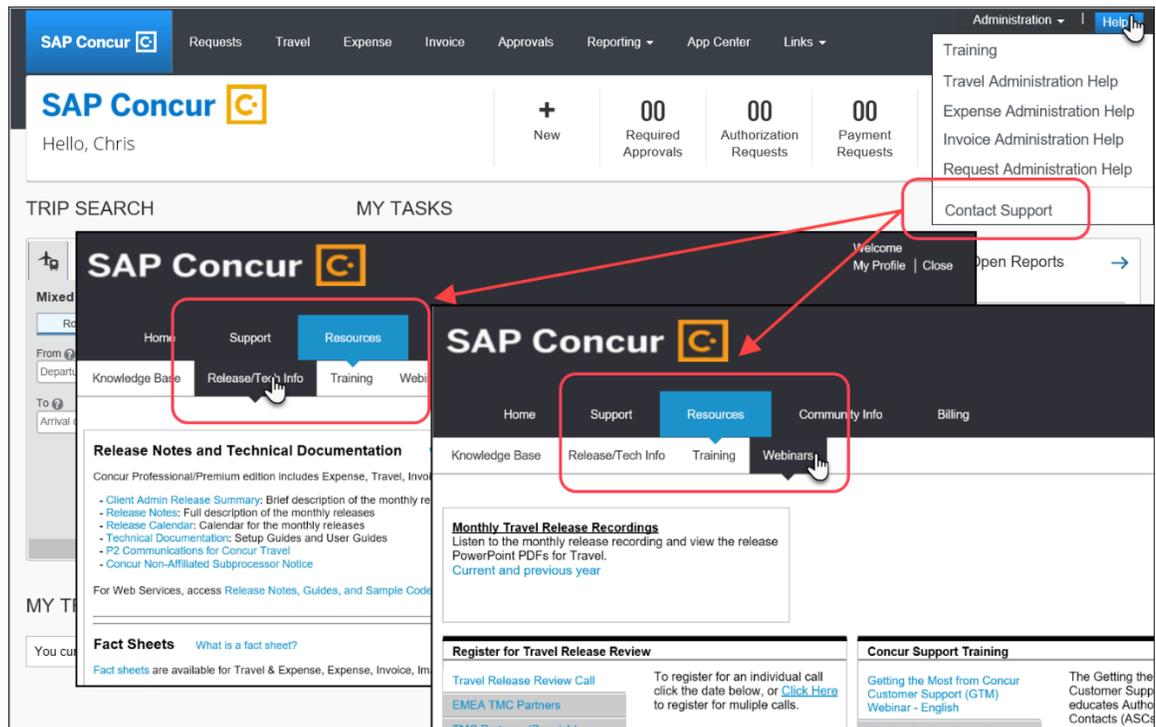

Use the links in the **Help** menu in the app, or search for your SAP Concur product (Concur Expense, Concur Invoice, Concur Request, or Concur Travel) on the SAP Help Portal (<https://help.sap.com>) to view the full set of documentation for your product.

SAP Concur Support Portal – Selected Users

Access release notes, webinars, and other technical documentation on the SAP Concur support portal.

If you have the proper permissions, the **Contact Support** appears on the **Help** menu. Click to access the SAP Concur support portal, then click **Resources**.

- Click **Release/Tech Info** for release notes, technical documents, etc.
- Click **Webinars** for recorded and live webinars.
