	Other	

Overview

Starting in April, administrators can allow users to select a rule class tied to the same configuration or agency. This will allow customers who currently have this setting enabled in their legacy Concur Travel experience to migrate to the new Concur Travel experience.

NOTE: The **Choose Rule Class - Allow Users to Choose Rule Class Tied to Same Configuration** setting is currently available to all new Concur Travel experience customers.

NOTE: The information from the February release note "***Planned Changes** New Concur Travel Experience: Choose Your Rule Class (Professional Edition Only)*" has been included here.

PHASES

This feature will be released to specific verticals between **April and May**:

Phase	Date of Release
Phase 1: Renfe Rail NOTE: For Renfe, all three options under the Rule Class Selection dropdown, (as in, User cannot select rule class, User can select from rule classes tied to this configuration, User can select from rule classes tied to this agency) will be supported. Until this change, only the User cannot select rule class is applied.	April 8 - 10
Phase 2: All other verticals	May 2024, date TBD

In the **Rule Class Options** section of Travel System Admin, administrators will be able to configure their travel sites to do the following:

- allow users to select from a rule class tied to this travel configuration.
- allow users to select a rule class tied to same agency.
- force users to select a rule when making a reservation.
- display a custom rule class label and
- opt out a rule class from displaying in the dropdown.

USER/CUSTOMER BENEFIT

This setting allows users to select which rules are suitable for the trip they are booking.

Administrator Experience

The administrator will be able to:

- enable the options **User can select from rule classes tied to this configuration** or **User can select from rule classes tied to same agency**.
- create a custom rule class label.
- select the **Force selection of a rule class** checkbox.

Rule Class Options

Rule Class Label

Air rules use base fare instead of total fare

Rule Class Selection

Force selection of a rule class (i.e., no default)

- select the **Choose Rule Class Opt Out** checkbox to remove the display of a rule class.

- display a custom message if the user does not select a rule class when required.

End-User Experience

The user will see a dropdown on the home page that contains rule classes associated with their travel configuration, excluding a rule class that has been opted out. If the force rule class is enabled, then users will see a blinking yellow outline that surrounds the dropdown. If the user does not select a rule (when required), they will be prompted to select a rule class.

Configuration for Professional Travel

Refer to the Administrator Experience section for set up details. If the setting has been previously enabled, no changes are required.

Flight

New Concur Travel Experience: Mixed Cabin Offers and Product Selection (Professional Edition Only) (Apr 22)

Prof	Stan	← ← Edition	
		On: Impacts end users who use this feature/vendor; no configuration/setup by agency/admin; cannot be turned OFF (example: new icons or rate display)	
		Available for use: No impact to end users unless/until configuration/setup by agency/admin (described below) (example: new rule, new Travelfusion airline)

Affected Documentation			
	TSGs		
	Fact Sheets		
	Admin Guides		
	Other		

Overview

On April 22, end users can mix different cabins between outbound and inbound flights, provided the selected itinerary does not have a brand. The initial search results for selected outbound flight options will continue to display roundtrip-based prices, where each offer shows the total cost of outbound and inbound flights in the same cabin.

When selecting any EDIFACT unbranded option on the outbound selection page, the inbound selection page displays mixed cabin options. Every price that is displayed on the inbound selection page is a round trip that includes a previously selected outbound cabin, combined with the inbound cabin displayed on that page.

LIMITATIONS

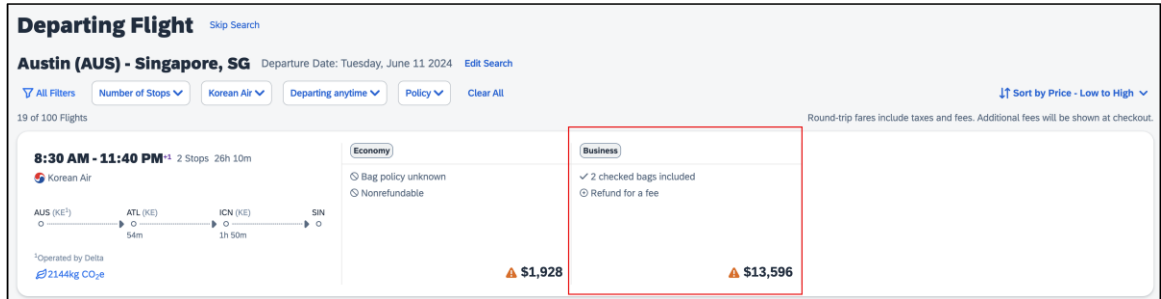

This feature is not currently supported for NDC flight bookings. It applies to non-branded EDIFACT flight bookings only.

If the selected outbound and inbound flights have different fare classes of service, and the selected offer is out-of-policy, the least cost logical fares (LLF) displayed on the policy violation popup is calculated using the outbound flight's fare class of service.

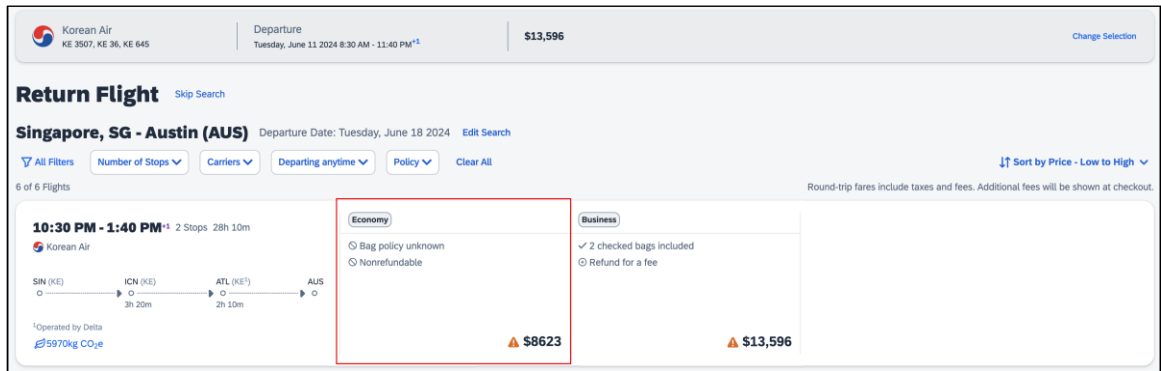

End-User Experience

With more flight options including mixed cabins, the end-user can shop offers with the best possible value when customizing their trip.

Example: On the outbound selection page, the end-user selects a business cabin:

On the inbound selection page, with consideration of the outbound offer, mixed prices are displayed with different cabins. For this example, an Economy cabin is selected.

Since no forced upsells or downsells occur, no warning displays. The end-user will be transferred to the **Review and Book** page to continue with the booking process.

Configuration for Professional Travel

This feature is enabled by default. There are no configuration steps.

New Concur Travel Experience: Persistent Filters and Sort Options (Professional Edition Only)

Prof	Stan	← ← Edition	
		On: Impacts end users who use this feature/vendor; no configuration/setup by agency/admin; cannot be turned OFF (example: new icons or rate display)	
		Available for use: No impact to end users unless/until configuration/setup by agency/admin (described below) (example: new rule, new Travefusion airline)

	Other		

Overview

Persistent filter and sort options have been added to the new Flight experience. To use filters and sort more efficiently, these options display as the user scrolls up and down the search results page. Additionally, filters remain expanded across the page for easier access.

End-User Experience

When search results are returned, filter and sort options are used to refine these results. With this change, sort options remain visible as the user scrolls through the results and filter options remain expanded, providing easier access to these features.

Configuration for Professional Travel

This feature is enabled by default. There are no configuration steps.

New Concur Travel Experience: Pricing Added to Carrier Filter (Professional Edition Only)

Prof	Stan	← ← Edition	
		On: Impacts end users who use this feature/vendor; no configuration/setup by agency/admin; cannot be turned OFF (example: new icons or rate display)	
		Available for use: No impact to end users unless/until configuration/setup by agency/admin (described below) (example: new rule, new Travefusion airline)

	Other		

Overview

To provide more transparency during the search workflow, prices have been added to the **Carriers** filter. Users can now compare airline prices at a glance to see which airline is the best value.

End-User Experience

The shopping experience has been enhanced by including prices beside each carrier, allowing the end user to review this information before they select the options to filter. The returned results will adjust as the user applies different filters.

Carriers	
<input type="checkbox"/> Alaska Airlines	€ 850
<input type="checkbox"/> American Airlines	€ 818

Overview

The new Hotel experience now includes additional filters on both the search results and **Hotel Details** pages. Customers can use the new sustainability filters to narrow their search results to the most sustainable properties, according to their score and/or their emissions.

End-User Experience: Search Results

When the user selects **Filters** on the search results page, there are two additional filters for **Sustainability**.

The first is **Sustainability score**, which allows users to select properties that have a score between 0 and 100 using a sliding scale. The default for this filter is zero.

The second filter is **Emissions**, which allows users to select properties between the lowest and the highest carbon emissions returned in the results using a sliding scale. The default for this filter is the highest number on the scale.

All Filters Clear All

Parent Brand

- Hilton Hotel and Resorts (36)
- Hyatt Hotel Corporation (24)
- Marriott (26)

Overview

The last four digits of a traveler’s credit card or other form of payment will display on the **Finalize** and **Trip Overview** pages, and Confirmation/Cancellation e-mails. The forms of payment will show for Trainline, Renfe, and all Hotel web-based bookings, and all vertical bookings on mobile.

PHASES

This feature will be released to specific verticals, vendors, and data centers between February and April:

Phase	Date of Release
Phase 1: Trainline (existing customers as they migrate to the new travel experience)	February 2024 (completed)
Phase 2: Hotel	April 2024
Phase 3: Renfe Rail customers in US Data Center	April 8, 2024
Phase 4: Renfe Rail customers in EU Data Center	April 10, 2024

USER/CUSTOMER BENEFIT

This update is being implemented to improve the customer experience by providing more complete information about each booking.

NOTE: For Trainline bookings, users are required to provide any valid form of payment to retrieve their tickets, not necessarily the form of payment used to make the booking.

End-User Experience

The last four digits of the user's credit card will display on different pages during the booking process.

These include:

- **Finalize** page
- **Trip Overview** page
- Confirmation E-Mail
- Cancellation E-Mail

The screenshot displays a train booking confirmation for the route London Victoria to Brighton. The departure is on Thursday, October 19, 2023, with a confirmation number placeholder. The journey details include a departure time of 10:03 AM, arrival at 11:49 AM, one change, a duration of 1h 30m, and 161kg CO₂e. The train is identified as Southern SN 2310, SN 2311. Two fare options are shown: Preferred and Corporate Fare. The ticket delivery is via eTicket, with a link to view the ticket. The payment method is My Corporate Card, with the last four digits displayed as ****1234. An option to view additional travel information is provided with a dropdown arrow.

	Other	

Overview

With this feature, users will be able to see calendar events for Microsoft and Google Calendars automatically created for their trips when they receive a **Trip Confirmation** e-mail. Trips are also automatically removed from calendars when a **Trip Cancellation** e-mail is received from SAP Concur. Users will automatically have their travel plans available in their preferred calendars without taking any additional actions, including opening their e-mails.

End-User Experience

When a user books a flight, hotel, or car, once the **Trip Confirmation** e-mail is received, the calendar entries (one per booking) will automatically be created in their Microsoft Outlook Office 365 calendar or their Google calendar. If a user cancels a trip and receives the **Trip Cancellation** e-mail, the calendar entries will be removed from their calendars automatically. This is accomplished via hidden json code embedded within the e-mail message that follows schema.org JSON markup standard and does not require the user to click on the ICS attachments in the e-mail.

There are specific settings within Microsoft Office 365 and Google that enable or disable this functionality that the user can control.

GOOGLE CALENDAR

Settings

To activate:

1. Go to **Google calendar settings > Events from Gmail > On Gmail Settings > Smart features and personalization -> On**. This setting does not only enable automated calendar event management from e-mails (event creation, modification and deletion), but also other features such as automated filtering and categorization of e-mails, intelligent writing (correction or proposals), intelligent search proposals etc.
2. Notifications for all-day calendar events (like Hotel Reservations) can be set on the user level. Go to **Google Calendar > Settings for my calendars > Personal Calendar > All-day event notifications**.

Allow-Listing

Only allow-listed sender domains are supported for the automated calendar event creation feature. The concursolutions.com domain is on the Google allow-list for e-mail markup as of March 2021.

Restrictions

The schema.org JSON markup for Rail and Rental Car reservations are currently not supported by Google. Even though embedded in the SAP Concur confirmation and cancellation e-mails, they will be ignored and no calendar event will be created.

OUTLOOK CALENDAR

Settings

To activate:

1. Go to <https://outlook.office.com/mail/options/calendar/calendarInEmail>, go to **Calendar > Events** from the e-mail to activate flight reservations, hotel reservations and rental car reservations individually.

There is an additional checkbox allowing the user to mark the events as private, so that only the user can see them.

Allow-Listing

Only allow-listed sender domains are supported for the automated calendar event creation feature. The [concursolutions.com](https://www.concursolutions.com) domain is on the Microsoft allow-list for e-mail markup as of March 2021.

Restrictions

The schema.org JSON markup for Rail reservations is currently not supported by Microsoft. Even though markup may be embedded in the SAP Concur confirmation and cancellation e-mails, it will be ignored and no calendar event will be created.

IMPORTANT NOTES

This feature is released in addition to .ics attachments, not as a replacement for .ics attachments, which the user can click to add events to any calendar application that supports them. Even with this feature enabled, .ics attachments are useful for the following reasons:

- Calendar event creation based on schema.org JSON in an e-mail must be set up on user level in the calendar software. Not all users may want to accept events by any allow-listed sender, but they have no option to restrict event creation to SAP Concur only. They may opt not to activate it and will then need the .ics attachments to create the event semi-manually in their calendar.
- Some customers may block their users from setting up the calendar integration. Those users depend on .ics attachments.
- There may be times where issues prevent the automated calendar event creation based on our e-mail markup. Some of the markup types (for example, Rail) are not currently supported by the calendar provider. .ics attachments offer a useful workaround in these cases.

Confirmation e-mails are sent out to both the traveler and the arranger, if the trip is booked by an arranger.

It is recommended that travel arrangers either don't activate automated event creation in Outlook or Google calendar or opt out of receiving confirmation e-mails from SAP Concur. This will prevent calendar events for reservations the arranger makes on behalf of their assigned travelers.

NOTE: Not embedding schema.org JSON markup in the e-mail sent to the arranger is not a solution, as the calendar suites will parse e-mails regardless and create calendar events for the reservations they detect; all that schema.org JSON does is improve the accuracy of the created calendar events.

Configuration for Professional Travel

This feature is enabled by default. There are no configuration steps.

Overview

On March 26, 2024, SAP Concur expanded the new Concur Travel experience to new markets beyond the United States. These markets are determined by the **Travel Agency Ticketing Currency**. If this is set to Canada, Mexico, UK or Ireland then the configuration is eligible for market expansion.

NOTE: Configurations set to **European Union** instead of a specific country are not eligible. To avoid this, while the currency can still be set to Euros, a specific country can also be selected.

Travel Agency Ticketing Currency ?

Canada (\$) ▾

Travel Agency Ticketing Currency ?

European Union (€)

USER/CUSTOMER BENEFIT

Customers outside the United States have access to the new Concur Travel experience. While they will still have control over when they choose to enable, the Flight, Car, Hotel and Rail experiences will be available for Sabre and Amadeus GDS based on regional timelines.

End-User Experience

End-users can enable the new Concur Travel experience based on a targeted rollout plan. The planned market expansion schedule is as follows:

NORTH AMERICA

- Sabre: Canada and Mexico was enabled on March 26.
- Amadeus: US, Canada, and Mexico will be enabled by June 25.

EMEA

- Sabre: The UK and Ireland was enabled on March 26.
- Amadeus: The UK and Ireland will be enabled by June 25.
- Sabre and Amadeus: France, Germany, Spain, Portugal, Italy, Austria, Switzerland, Belgium, Netherlands, Luxembourg, **Norway, Sweden, Denmark, Finland, and Iceland** will be enabled by June 25.

Configuration for Professional Travel

Administrators with the Company Admin permission can navigate to the **Manage New Concur Travel Experience Preferences** page to opt out if they choose not to participate in this round of market expansion. This can be done at the configuration level (country or market) or at the individual Flight, Rental Car, or Hotel level by clicking the configuration under the **Company Level Preference** section.

Overview

Concur Travel is enhancing the user experience when adding bookings to an existing trip.

In this release, when adding Hotel to an existing trip, the **Your Reservations** dropdown is enhanced to contain relevant information from the previously booked Flight, Car, and/or Rail booking. When the trip contains a single booking, Concur Travel pre-selects one of the values from the dropdown. More details about this enhancement are available in the user experience section of this release note.

In upcoming releases, similar enhancements will also be available for Flight and Car, and a new modal will be available when adding a new Concur Travel experience booking to another new Concur Travel experience booking. The user experience will remain the same when adding a new Concur Travel experience booking to a legacy Concur Travel booking.

PHASES

This feature will be released in phases:

Phase	Date of Release
Phase 1: <ul style="list-style-type: none"> Enhancements in the "Your reservations" dropdown options and pre-selection of one of the options when adding Hotel to an existing trip. No changes to existing user interface. 	March 2024

Phase	Date of Release
Phase 2: <ul style="list-style-type: none"> Enhancements in the "Your reservations" dropdown options and pre-selection of one of the options when adding Flight and Car to an existing trip. New UI modal available when adding New Concur Travel experience Flight, Hotel or Car content to a New Concur Travel experience trip. 	June 2024
Phase 3: <ul style="list-style-type: none"> Add Rail to existing Trip. 	TBD

USER/CUSTOMER BENEFIT

The user sees more helpful details when adding Flight and Hotel to an existing trip.

End-User Experience

When adding Hotel to to an existing trip, the **Your Reservations** dropdown shows the following options, in chronological order:

Flights: If the trip includes flights, the user sees the following:

- **Flight: Closest city to the Destination Airport, Arrival date** - When selected, the closest city to the destination airport is added to the **Destination** field, and the arrival date and departure date of the destination airport is added to the **Dates** field.
- **Flight: Closest city to the final Airport, Arrival date** - When selected, the closest city to the final airport is added to the **Destination** field, and the arrival date of the final airport with a one-night stay is added to the **Dates** field.

Search

 Please select the date and destination from your trip to which you would like to add a booking.

Your Reservations
 Flight: Aulnay-sous-Bois, 06/04/2024
 Flight: Aulnay-sous-Bois, 06/04/2024
 Flight: Frankfurt, 06/06/2024
 Aulnay-sous-bois

Dates *
 06/04/2024 - 06/06/2024

Distance *
 5 mi

Search

Train: If the trip includes Train, the user sees the following:

- **Train: Closest city to the Destination Rail Station, Arrival date** - When selected, the closest city to the destination rail station is added to the **Destination** field, and the arrival date and departure date of the destination rail stations is added to the **Dates** field.
- **Train: Closest city to the final Rail Station, Arrival date** - When selected, the closest city to the final rail station is added to the **Destination** field, and the arrival date of the final Rail Station with a one-night stay is added to the **Dates** field.

The screenshot shows a 'Search' form titled 'Accommodation Search'. It includes a dropdown menu for 'Your Reservations' with the selected item 'Train: London, 06/04/2024'. Below it, a 'Destination' field is populated with 'London'. The 'Dates' field shows '06/04/2024 - 06/06/2024' and the 'Distance' field shows '5 mi'. A blue 'Search' button is at the bottom.

Car: If the trip includes a rental car, the user sees the following:

- **Car pick-up (Rental Car: Closest city to the Car Pick Up, Pick up date)** - When selected, the closest city to the car pick up is added to the **Destination** field, and the pick up date and drop off date of the rental car is added to the **Dates** field.

The screenshot shows a 'Search' form titled 'Accommodation Search'. It includes a dropdown menu for 'Your Reservations' with the selected item 'Rental Car: Aulnay-sous-Bois, 06/04/2024'. Below it, a 'Destination' field is populated with 'Aulnay-sous-Bois'. The 'Dates' field shows '06/04/2024 - 06/06/2024' and the 'Distance' field shows '5 mi'. A blue 'Search' button is at the bottom.

If the trip has only one reservation, when adding Hotel to an existing trip, the following is pre-selected in the **Your Reservations** pop-up:

- Flight: Arrival to the destination Airport
- Train: Arrival to the destination Rail Station
- Car: Pick-up

Overview

Targeted for the March to **September** 2024 releases, the **Trip History** feature is available for the new Concur Travel experience. This feature provides access to detailed historical records of all trips associated with an account. Data will be available indefinitely (except for legal, compliance policies such as GDPR “Right to be Forgotten” requests), even if the trip is subsequently cancelled and after the trip has been completed.

PHASES

This feature will be released in phases, with the first **Trip History** events visible starting on March 29:

Phase	Date of Release
Phase 1: New History tab on the Trip Overview Page. <ul style="list-style-type: none"> • Trip-level events • Trip Created • Trip Cancelled • Trip Confirmed • Confirmation E-mail Sent • Trip Sent to Agency for Processing • Stand-alone Approvals events • Trip Submitted for Approval • Trip Logged for Reporting • Manager Notified • Trip Approved • Trip Rejected • Approval Deadline Expired 	March 29, 2024 (completed)
Phase 2: <ul style="list-style-type: none"> • Booking-Specific events (for example, Booking Created, Booking Cancelled, Booking Updated, Booking Failed for Car, Hotel, and Rail Bookings), Booking Failed to Cancel 	Q3 2024
Phase 3: <ul style="list-style-type: none"> • Approvals via Request Integration • Additional data included in already available events • Trip History available in the SAP Concur Mobile App 	Specific dates are TBD in 2024 and will be announced in the release notes.

A detailed list of supported events and which information they include with each phase will be provided in the release note for the month they are available.

NOTE: Trips which include bookings from both the legacy and new Concur Travel experience are included only in the legacy **Trip History**, on the web application, and show bookings regardless of whether they were booked via the legacy or new Concur Travel experience.

Trips which include bookings from only the new Concur Travel experience are included within the new experience’s **Trip History**, on both web and mobile applications. For the mobile app, this feature will be availability in April.

USER/CUSTOMER BENEFIT

This feature provides greater clarity and confidence in the details of the Concur Travel booking experience, allowing users to search for and reference trip details more quickly and easily. This will allow users to avoid having to request information via a support case.

Users and arrangers can see the **Trip History** tab on the **Trip Overview** page. TMCs, Support Agents, and SAP Concur representatives can see the history via Support Tools, which will be included in a future release.

End-User Experience

Historical data includes:

- the original details of the trip and the travel provider, for example, airlines, hotels, locations etc.
- significant edits to a trip
- the identity of the person performing each action taken on the trip
- dates and time stamps
- ticket and confirmation numbers
- approvals and rejections
- policy violations
- detailed trip costs
- specific details of travel providers

PHASE I DETAILS:

Event	Data Included	Notes/Additional Information
Trip Created	<ul style="list-style-type: none"> • Who • Date Time Timezone 	
Trip Cancelled	<ul style="list-style-type: none"> • Who • Date Time Timezone 	
Trip Confirmed	<ul style="list-style-type: none"> • Who • Date Time Timezone 	
Confirmation E-mail Sent	<ul style="list-style-type: none"> • Date Time Timezone • Which user / e-mail address 	
Trip Sent to Agency for Processing)	<ul style="list-style-type: none"> • Date Time Timezone 	For Trips sent to Agency for Finishing and/or Ticketing
Trip Logged for Reporting	<ul style="list-style-type: none"> • Date Time Timezone 	

Event	Data Included	Notes/Additional Information
Trip Submitted for Approval	<ul style="list-style-type: none"> Who submitted the trip for approval Date Time Timezone When trip was submitted for approval Whose approval is required Approval deadline E-mail sent to Approver 	If a user creates a new booking, with new dates, and this changes the Approval deadline, there will be a second "Trip Submitted for Approval" event with the new details, and new Approval deadline.
Manager Notified	<ul style="list-style-type: none"> Date Time Timezone Which e-mail address 	
Trip Approved	<ul style="list-style-type: none"> Who Approved Date Time Timezone Approver's Comments (if any) 	
Trip Rejected	<ul style="list-style-type: none"> Who Rejected Date Time Timezone Approver's Comments (if any) 	
Approval Deadline Expired	<ul style="list-style-type: none"> Date Time Timezone 	

▶ **To access trip histories:**

1. On the **Trip Overview** page, click the **Trip History** tab.
2. The **Trip History** tab displays all the events that took place for the trip in either ascending or descending chronological sort order, such as Creation, Cancellation, Approval etc.
3. To expand the content and see additional details, click the arrow icon next to the event.

NOTE: Events will become visible for **new** trips created after this feature is released and as new events become available with each phase. This means there will be no backfill for older trips or user actions on existing trips. For example, a trip created in April (after the March release) will have the "Trip Created" event available in **Trip History**, but no "Booking Created" events for any of the bookings. However, if a booking in that trip is subsequently cancelled after the Q3 release, there will be a "Booking Cancelled" event, without the corresponding "Booking Created" event.

Configuration for Professional Travel

This feature is enabled by default. There are no configuration steps.

Overview

In the February to April releases, the **Skip Search** action will be available for the new Concur Travel experience. This feature allows a user to discard the search workflow for a trip segment and return to one of three UI pages, depending on the previous workflow.

PHASES

This feature will be released to specific verticals, vendors, and data centers between February and April:

Phase	Date of Release
Phase 1: Trainline (existing customers with migration to the new travel experience)	February 2024 (completed)
Phase 1: Flight, Car, Hotel	February 2024 (completed)
Phase 3: Renfe Rail customers in US Data Center	April 8, 2024
Phase 4: Renfe Rail customers in EU Data Center	April 10, 2024

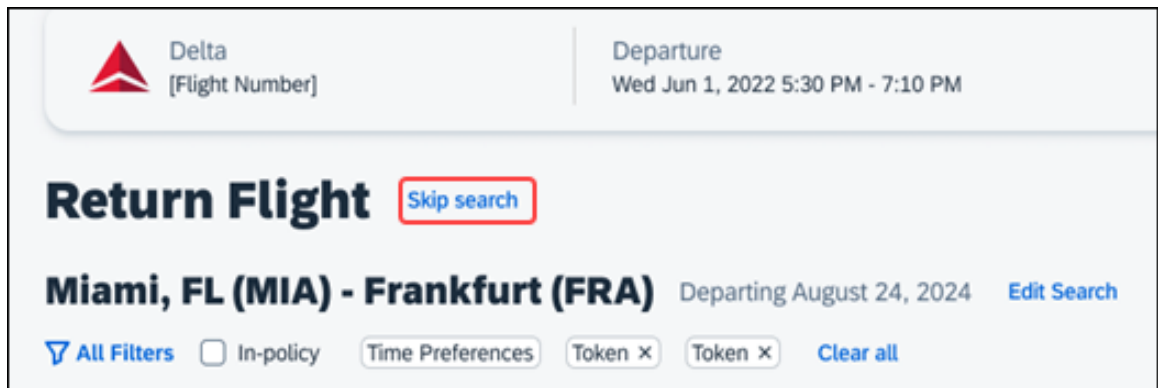

USER/CUSTOMER BENEFIT

This feature is comparable to existing components in the current Concur Travel shopping experience. It provides the user a one-click method of returning to their trip booking workflow, should they decide not to complete a search and book option.

End-User Experience

The **Skip Search** link allows a user to discard the search workflow for a trip segment, returning the user to one of three UI pages, depending on the previous workflow.

For example, if a user decides to book a flight reservation, searches for a flight, and then decides NOT to book a flight, they click **Skip Search**.

The **Skip search** option behaves as follows:

- If there is an existing booking for the given trip, but it is not yet finalized, then the user is redirected to the **Finalize** page.
- If there is an existing booking for the given trip and it was previously finalized, then the user is redirected to the **Trip Overview** page.
- If there is no existing booking or trip, then the user is redirected to the SAP Concur Travel **home** page.

Configuration for Professional Travel

This feature is enabled by default. There are no configuration steps.

****Ongoing** New Concur Travel Experience: Feature Exclusions, Limitations & Changed Behavior (Professional Edition Only)**

Information First Published	Information Last Modified	Feature Target Release Date
September 15, 2023	March 15, 2024	TBD
Any changes since the previous monthly release are highlighted in yellow in this release note.		

Overview

SAP Concur is delivering the new Concur Travel experience through phased software releases, while limiting the impact on customers and travelers.

- All customers and travelers can continue to use Concur Travel, which will support all existing capabilities.
- Travelers will continue to use their same URLs, logins, passwords, and mobile application. No specific traveler access change is required.
- The system is designed so that if a traveler were to book something not yet supported, they would be directed to the current booking flow they already know and use. Over time, as those capabilities are added to the new experience, redirects will be less frequent.

For customers that want to see the Q4 2023 release of the new Concur Travel experience:

- The customer’s servicing TMC must have acknowledged support for bookings made through the new Concur Travel experience.
- Customers must be eligible, based on content sources, policies, and configuration settings, as described in the linked document below.

Customers will automatically receive the Q4 2023 release of the new Concur Travel experience unless the customer or their TMC chooses to opt out.

USER/CUSTOMER BENEFIT

With all the changes in user experience to address the current industry capabilities and traveler expectations, some policy rules or features may no longer be relevant. These will be decommissioned over time and will be outlined in the linked document below.

End-User Experience

Every company, travel program, and traveler are different, so SAP Concur wants to ensure that you have the information to understand when it’s the right time to implement the new booking experience in your organization.

Continue to check this release note as SAP Concur will update it regularly with additional details as development continues.

For more information about disclaimers, exclusions, limitations, and more, please refer to the [New Concur Travel Experience: Exclusions, Limitations, Redirects & Enhancements](#) document.

Configuration for Professional Travel

For configuration instructions, please refer to individual release notes.

Overview

Previously, in the **Traveler Information** section on the **Review and Book** page, the customer could only see their default phone number and e-mail address, even if several were configured in their profile. With the April release, users will be able to choose which option they prefer.

End-User Experience

With this change, users can select the e-mail address or phone number that will be used for a booking from a dropdown, when multiple options exist in their profile. The default e-mail or phone number will be automatically populated, but users can change this in the new dropdown. The selected phone number and e-mail address is sent to the rail supplier, where applicable.

Traveler Information
 The SAP Concur profile was used to complete the traveler information. Please ensure this information matches what is on the government issued ID.

Overview

New rules are now supported for Renfe to match the legacy Concur Travel experience. This requires that Renfe clients update their rule class setup.

USER/CUSTOMER BENEFIT

To provide a more effective and consistent user experience, the Renfe rules have been updated for the new Concur Travel experience.

End-User Experience

The following rules are supported for Renfe in the new Concur Travel experience.

FLIGHT

- Flight Number [condition] [FlightNumber]
- Flight Number is in the list of [FlightNumber]
- Air Fare is [condition] [currency][money]

- Trip duration [condition] [DaysLong] days
- Rail fare description contains [DescriptionList]
- Train is from source [Vendor] and Operating Carrier in [CarrierList]
- Train is from source [Vendor] and train type in [TrainTypeList]

VIEW MORE FARES

These rules are applied during the initial search.

- Fare in cabin classes: [CabinList] is [condition] the least cost logical airfare plus [difference] [currencyOrPercent]
- Refundable fare in cabin classes: [CabinList] is [condition] the least cost logical airfare plus [difference] [currencyOrPercent]
- Refundable fare in cabin classes: [CabinList] is [condition] the cheapest fare in flight plus [difference] [currencyOrPercent]
- Fare in cabin classes: [CabinList] is [condition] the cheapest refundable fare in flight plus [difference] [currencyOrPercent]
- First leg departure City is [CityCodeList]
- First leg departure City is not [CityCodeList]
- First leg arrival City is [CityCodeList]
- First leg arrival City is not [CityCodeList]
- User requested Area Airports and flights do not depart from/return to the same airport
- One or more fare basis codes contain [FareBasisText]
- One or more fare basis codes do not contain [FareBasisText]

CLASS OF SERVICE GROUP (UNIQUE FROM FLIGHT GROUP)

- Cabin classes allowed: [CabinClasses]
- Leg duration [condition] that of the shortest option available plus [minutes] minutes, [incExcLayovers] layovers

CONSIDERATIONS WHEN SETTING UP FLIGHT RULES FOR RAIL:

- City code is Rail station code.
- Flight number is a maximum of 4 digits.

NOTE: The admin interface limit may not be long enough for train number.

- There is no difference between marketing / operating / validating carriers in Rail.
- Rail fare always checks the total cost.
- For LLF definition:
 - ◆ If "Include rail" option is OFF, LLF will be turned off for Rail.
 - ◆ Refundability option only applies when this information is available.
 - ◆ Center time calculation does not support morning, afternoon, evening, or anytime.
 - ◆ Arrival time is not supported.
- Outbound policy violations will not be called out-of-policy, even if no inbound fares can be combined with the specific outbound fare to yield a policy compliant option. For example, if a rule is set up as "Air Fare greater than \$50 - require approval" and cheapest outbound fare is \$40 and cheapest inbound fare is \$30, then
 - ◆ The outbound fare will not be marked out-of-policy.
 - ◆ All inbound fares will be marked out-of-policy.

Configuration for Professional Travel

No additional steps are required by administrators to support this change. However, SAP Concur recommends that clients provide messaging within Concur Travel to inform travelers of the updated rule set.

Overview

Starting April 8 -10, SAP Concur will support standalone approvals for Renfe, as it does for all other verticals and rail vendors. **Require Approval** and **Require Passive Approval** rules are no longer downgraded.

In the previous Concur Travel booking experience and in cases where a trip was booked using current and new booking experiences together ("mixed trips"), if **Require Approval** or **Require Passive Approval** rules were broken, and the approver either rejected or did not take an action on the trip by the approval deadline, the trip was:

- Auto-finalized, allowing for trip fulfilment for certain booking sources where bookings are not fully refundable or cancellation isn't possible (for trips containing Cleartrip, Travelfusion, Evolvi, Trainline, and Renfe bookings).
- Neither auto-cancelled nor auto-finalized, where the trip is left unactioned in Concur Travel (for trips containing UK Rail, and Deutsch Bahn bookings).
- Auto cancelled, for all other booking sources where bookings are fully refundable and can be cancelled (for example, GDS Air bookings, before ticketing).

In this release, for trips booked entirely on the new Concur Travel experience, if the **Require Approval** or **Require Passive Approval** rules are broken, and the approver either rejects or does not action the trip by the trip approval deadline, Concur Travel checks all bookings on the trip for cancel / refund ability, regardless of booking source.

If **Require Approval** or **Require Passive Approval** rules are broken, and the approver either rejects or does not take action on the trip by the approval deadline, the trip is:

- Auto-finalized, allowing for trip fulfilment for trips with at least one non-cancelable or not fully refundable booking or where cancellation isn't possible (for example, one trip that includes a Trainline booking, as this content cannot yet be cancelled in Concur Travel).
- Auto-cancelled, for all bookings that are fully refundable and can be cancelled (for example, GDS Air bookings, before ticketing).

For mixed trips containing Renfe as a booking source, Concur Travel auto-finalizes the trip, allowing for trip fulfilment if the trip contains at least one booking non-cancelable or cancellable with a fee. Otherwise, it auto cancels the trip. Mixed trip behavior is unchanged.

For trips booked entirely on the new Concur Travel Experience and for mixed trips, Concur Travel continues to respect the auto cancel settings **Allow Auto Cancel of trips that require approval**, **Allow Auto Cancel of air/rail trips that are rejected**, and **Allow immediate Cancel of Non-air/rail trips that are rejected**. When set to not allow auto-cancellation, Concur Travel does not auto-cancel nor auto-finalize the trip. When set to allow auto-cancellation, Concur Travel no longer leaves trips in an un-actioned state and is auto-finalizing more trips due to improved awareness around ability to cancel and refund.

USER/CUSTOMER BENEFIT

To provide a more effective and consistent user experience, the Trainline rules are updated for the new Concur Travel experience. The previous limitation has been removed.

End-User Experience

When the user books a trip that will be auto-finalized, they will see the following:

Example: Trip Confirmation page

Affected Documentation			
	TSGs		
	Fact Sheets		
	Admin Guides		
	Other	Concur Travel Professional Edition End User Help	

Overview

In this release, the method with which an approval deadline is calculated will change. This will allow for an approver to process a trip. If unprocessed, the trip will attempt to be auto-cancelled.

NOTE: For customers with Renfe or Trainline enabled, the updated approval deadline logic also currently applies to flight, rental car, and hotel bookings. Targeted for April 19, the approval deadline logic will apply to flight, rental car, and hotel bookings regardless of whether a customer is enabled with Renfe or Trainline.

USER/CUSTOMER BENEFIT

This change is being made to provide a more consistent approval deadline behavior between SAP Concur products.

End-User Experience

Currently in the new Concur Travel experience when a booking is either non-refundable, instant purchase, or same day booking, the approval deadline is not calculated. If the approver does not take any action, the trip will remain live in the system and the traveler must contact the travel agency to cancel the booking.

With this update, an approval deadline will be calculated irrespective of the trip content. For a booking with non-refundable or instant purchase content, the approval deadline will be calculated as the booking start date, less one day.

The trip approval deadline will still be the sooner of all the booking's individual booking times. Please refer to the examples below:

Any trip with only one Flight booking, where the booking has a deadline:

- Soonest of either **Booking 1 Deadline** or **Agency Time**, less 2 hours.

Any trip with only one booking, where the booking does not have a deadline:

- Trip start, less 1 day.

Any trip with two bookings (one of which is Flight and the other is not), where all the bookings have a deadline:

- a. The soonest of either **Booking 1 Flight Deadline** or **Agency Time**, less 2 hours.
- b. **Booking 2 Deadline**, less 2 hours.
- c. The soonest of either a. or b.

Any trip with two bookings (one of which is Flight, and the other is not), where the first booking has a deadline, and the second booking does not have a deadline:

- The soonest of **Booking 1 Deadline**, or **Agency Time**, less 2 hours.
- Trip start, less 1 day.
- The soonest of either a. or b.

For same day bookings, the **Trip Start Time less 2 hours** will be used. If the approval deadline is in the past, the trip will be automatically cancelled immediately after booking. The traveler will be warned of the cancellation on the **Confirmation** page.

If the assigned approver does not take action by the approval deadline, the trip will be sent for auto-cancellation. However, if the trip cannot be cancelled or has at least one booking that is not fully refundable, the trip will not be cancelled but sent for finishing instead.

Configuration for Professional Travel

No additional steps are required by administrators to support this change. However, SAP Concur recommends that clients provide messaging within Concur Travel to inform travelers of these changes.

New Concur Travel Experience: Renfe - User Interface Changes to Workflow Pages and E-mails (Professional Edition Only) (April 8-10)

Overview

From April 8-10, there are changes to the view of the Renfe user interface. These changes affect Shop and **Review and Book** pages.

USER/CUSTOMER BENEFIT

To provide a more consistent user experience, some Renfe pages are updated to resemble Flight pages.

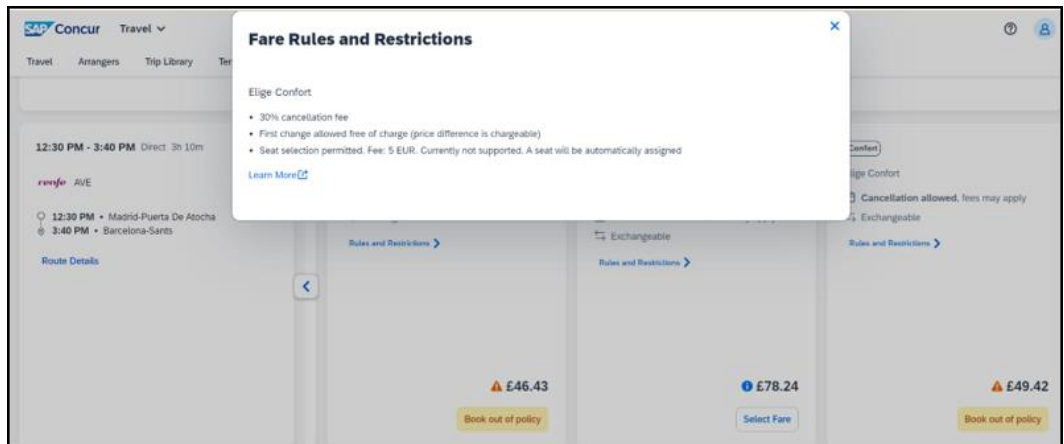

End-User Experience

These updates apply mostly to the Shop result and **Review and Book** pages.

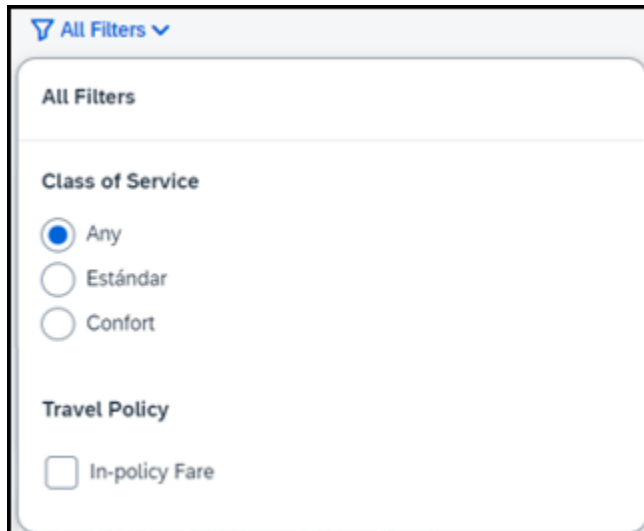

Changes to the search results display:

- New horizontal display of the search results: Up to four fares display as the initial search results. All remaining available fare options display upon expanding the itinerary.

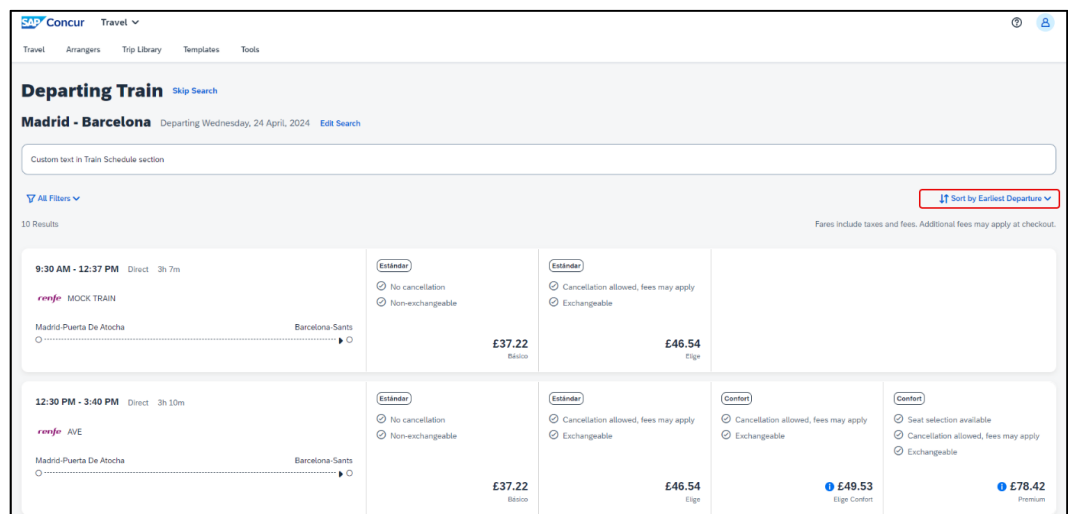

- Updated **Fare Rules and Restrictions** pop-up window.

- Updated Filter options.

- Updated Sort options.

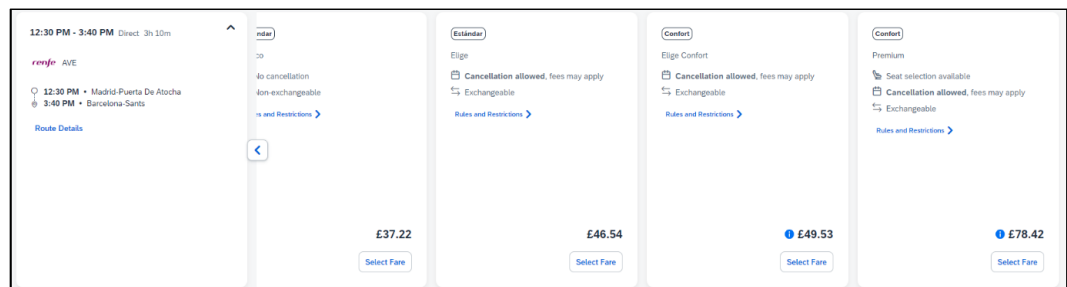

- Support display of Preference label.

- Display of fares in the configured currency instead of vendor currency.

Changes to **Review and Book** page:

- Updated display of itinerary.

Review and Book

This is an instant purchase. Clicking Book and Continue button will issue the ticket immediately.

Overview

If an out-of-policy fare is chosen by the user when creating a booking, the options not chosen are captured and displayed, both to the user and to the approvers. This allows the approver to view the alternatives that were not selected.

USER/CUSTOMER BENEFIT

The updates to the **Policy** section for Rail provide a more cohesive Concur Travel experience. They allow for the visibility of available fares not chosen when creating out-of-policy bookings.

End-User Experience

When booking out-of-policy, a list of **Train Options Turned Down** is displayed. This list is available to the user on the **Review and Book** page within the **Travel Policy** section. For approvers, the **Train Options Turned Down** list is available in the approver view and in the approver e-mail.

When Least Cost Logical Fare (LLF) is enabled but not chosen during a booking, the first option in the list is a declined LLF. The other list items are the remaining in-policy offers that have not been chosen.

Example:

This is an instant purchase. Clicking Book and Continue button will issue the ticket immediately.

Overview

For bookings of out-of-policy fares, users are required to select a policy violation reason. From April 8 – April 10, Concur Travel introduces support for **Allow Multiple Violation Reason Codes** for Renfe.

USER/CUSTOMER BENEFIT

The updates to the Policy section for rail provides a more cohesive Concur Travel experience. They allow for improved visibility of violated policy rules and the ability to provide multiple violation reasons for rail bookings.

End-User Experience

If **Allow Multiple Violation Reason Codes** is enabled and multiple travel policy rules are violated, a user may be requested to select multiple violation reasons on the **Review and Book page** if different policy violation reason types are configured for the rules.

The user interface displays a list of all the policy rules violated, grouped by the rule action.

	Admin Guides	
	Other	

Overview

The Configurable Message Boards allow clients to influence end user behavior with dynamic, rule based, messaging. The new Concur Travel experience for Renfe Rail supports new placements with the release between April 8 and April 10.

USER/CUSTOMER BENEFIT

Configurable Message Boards provide administrators with the opportunity to configure informative custom messaging for specific scenarios based on policy rules to their end users.

End-User Experience

Messages display on the shop page. They can appear inline:

Or in a popup:

Configuration for Professional Travel

In the **Travel Policy Administration** section, rules can be configured under **Messages - Air Fare Shop Results**:

Support for configurable message boards is limited to the web user interface. Rich text including formatting and hyperlinks are supported.

Any message entered manually by an administrator is not localized. If a message is not set up by an administrator, the localized rule displays to the user.

NOTE: It is not possible to configure configurable message boards separately for Rail and Flight bookings. If configured, messaging displays for both.

New Concur Travel Experience: Renfe - Support for Multiple Rail Connectors (Professional Edition Only) (April 8-10)

Prof	Stan	◀ ◀ Edition

	Other		

Overview

Concur Travel offers multiple rail connectors. From April 8-10, support has been added for any rail connectors offered by Concur Travel to be enabled with Renfe.

USER/CUSTOMER BENEFIT

This change provides administrators with the opportunity to enable a wider rail offering to their users on one travel configuration in the new Concur Travel experience.

End-User Experience

End users can book with any of the enabled rail connectors.

For travel configurations where only rail connectors in the New Concur Travel Experience are enabled, vendor selection by the user is not necessary.

For travel configurations combining current and New Concur Travel Experience rail connectors, the user can select the vendor from a dropdown.

Configuration for Professional Travel

No additional steps are required by administrators to support this change.

Any new rail connectors can be added or removed on the **Company Travel Configuration** page.

NOTE: Currently when Renfe is enabled alongside any additional rail connector, only Renfe is available to the end users. From April, if any additional rail connector is enabled, it is available to end users. Administrators should check their **Company Travel Configuration** settings.

New Concur Travel Experience: Renfe – Allow/Display Message Support (Professional Edition Only) (April 8-10)

Prof	Stan	← ← Edition	
		On: Impacts <i>end users</i> who use this feature/vendor; no configuration/setup by agency/admin; cannot be turned OFF (example: new icons or rate display, new Amtrak feature)

Overview

From April 8 and April 10, support for additional policy-based messaging set by administrators is available. **Allow** and **Display Message** enforcement levels will behave similarly. When a rule is set up with these levels, the user can book the segment without restrictions.

USER/CUSTOMER BENEFIT

This functionality provides administrators with more options for adding policy-based information for travelers.

End-User Experience

Example: A message displays to customers.

Configuration for Professional Travel

In the Travel Policy Administration section, administrators can set rules with the applicable enforcement level, and configure a message for it when matched.

NOTE: Not all types of rules have both enforcement levels. For example, train rules allow for **Display Message**, whereas Flight - Class of Service rules allow for **Allow**.

New Concur Travel Experience: CO2 Emissions Display (Professional Edition Only)

	TSGs		
	Fact Sheets		
	Admin Guides		
	Other		

Overview

With this release, the carbon dioxide (CO2) emissions display is updated for UK Rail (Trainline) and is available for Renfe Rail for web. Support for the improved display of CO2 on mobile is planned for a later release.

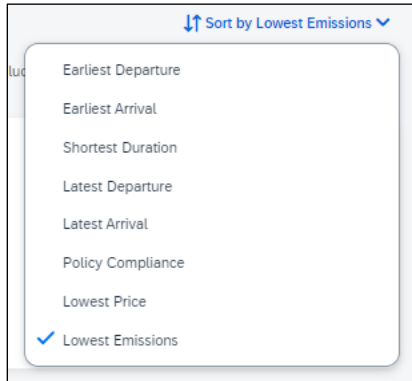

USER/CUSTOMER BENEFIT

When shopping and booking rail, customers now have access to CO2 emissions information applicable to their rail journey. Display of CO2 emissions is supported per journey segment and per class of service. For Renfe, the option to sort by emissions is also available.

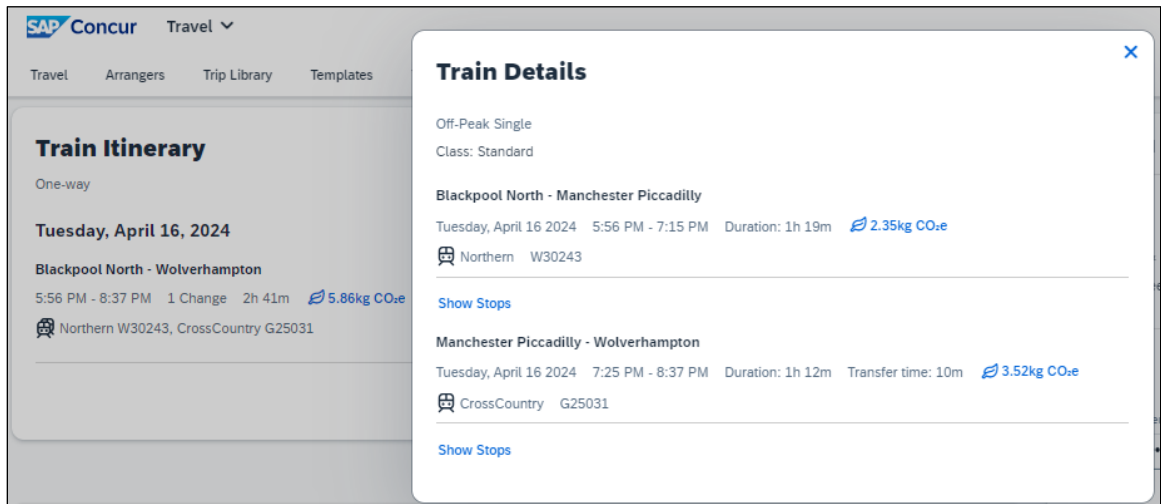

End-User Experience

The CO2 emissions is shown to the user on the Shop pages, where it is displayed per class of service. CO2 per segment is available on Train Details modal which is displayed on **Review and Book** page, **Finalize** page and **Trip Overview** page.

On shop pages, the option to sort by emissions is available for Renfe. This sorting is already supported for Trainline.

NOTE: CO2 emissions display with two decimal places. This could cause a discrepancy while displaying the total amount of CO2 for the total journey compared to single segments. The sum of segments might not correspond to the total amount per journey, due to the rounding to two decimal places.

Configuration for Professional Travel

This feature is enabled by default. There are no configuration steps.

New Concur Travel Experience: Trainline - Available on Amadeus, Sabre, Galileo (Professional Edition Only) (April 10)

Overview

From April 10, the UK Rail (Trainline) connector has been added to all travel configurations on Amadeus, Sabre and Galileo. New clients can enable the UK Rail (Trainline) connector for Rail content. This announcement is in conjunction with the Trainline migration release note. Customers who have already migrated to Trainline will see the new Trainline connection from the end of February. New clients who are interested in enabling the new Trainline connection and meet the requirements can do so from April 10.

USER/CUSTOMER BENEFIT

The new Concur Travel rail booking experience together with the new Trainline connection will bring clients the following benefits:

- New user interface
- Reduced number of steps to complete the booking
- Support for eTicket delivery option
- Support for UK Rail bookings on mobile application

End-User Experience

The booking workflow includes search, book, and itinerary review.

SEARCH

The user clicks the **Rail** tab and initiates their search for **Round Trip** or **One Way**. For the **Open Return** option, the user enables the **Open Return** checkbox in the **Round Trip** option to omit selecting a return date and time.

SELECT A TRAIN

Clicking **Search** displays the results.

Train Details	Standard	Standard Premium	First	First Off-Peak
2:13 PM - 4:19 PM Direct 2h 6m Avanti West Coast London Euston to Manchester Piccadilly 9.83kg CO ₂ e	£26.40 Advance Single	£42.90 Advance Single Standard Premium	£75.20 Advance Single (1st Class)	£118.30 Off-Peak Single (1st Class)
2:33 PM - 4:44 PM Direct 2h 11m Avanti West Coast				

To see all available fares, click on the required train. All fares display with information on the alternative stations and **Rules and Restrictions**. If Railcard savings are applied, it is visible in the fare. The original and the discounted price are also presented to the user.

Departing Train [Skip Search](#)

London - Manchester Departing Wednesday, 13 March 2024 [Edit Search](#)

5 Results Sort by Earliest Departure

Fares include taxes and fees. Additional fees may apply at checkout.

Train	Fare Type	Original Price	Discounted Price	Notes

[Book and Continue](#)
[Change selections](#)

For more information on the **Train Itinerary**, see **View Train Details**.

The **Form of Payments** that displays in the dropdown depend on the agreement between the client, travel agency and Trainline. The **Update Card** option is available only for personal cards when selected from the dropdown.

The **Travel Preferences** section contains the **Seat Reservation** information and **Seat Preferences**, if applicable. No seat preferences are displayed if the seat reservation is not available. The availability of seat reservation depends on the selected route and carrier.

The **Ticket Delivery Preference** section offers two ticket delivery options, if applicable: **eTicket** (free of charge) and **Kiosk** (with a fee). The **eTicket** option is preselected if both options are available. Depending on the selected route, the eTicket might not be offered (for example, if a tube is part of the journey).

NOTE: An eTicket must be enabled with Trainline for the client to see this delivery option. Depending on their contract, the client should contact their travel agency or Trainline if they are interested in the eTicket delivery option.

The screenshot shows a form titled "Ticket Delivery Preference" with the subtitle "Select how you would like to receive your ticket." Below the title is a dropdown menu labeled "Delivery Option *". The dropdown is open, showing three options: "eTicket (£0.00 fee)" (which is highlighted in light blue), "eTicket (£0.00 fee)", and "Kiosk (£1.50 delivery fee)".

After the user confirms the rules and restrictions and clicks **Book and Continue**, they are redirected to the **Finalize** page.

FINALIZE

The **Finalize** page allows a user to add accommodation or rental car. It also provides the user with the overview of their UK Rail (Trainline) booking.

If the client's travel agency has a support contact enabled, it then appears on the itinerary of the Trainline booking.

CANCEL TRIP

Cancellation of the Trainline booking is not supported. The user sees the following message when attempting to cancel the Trainline booking:

“Cancellation is not available for at least one content provider. Please contact the supplier or your travel agency for assistance.”

Configuration for Professional Travel

No additional steps are required by administrators to support this change.

The enablement process for the UK Rail (Trainline) connector is described in the following section.

FOR GENERAL CONFIGURATION AND ACTIVATION

1. Go to **Administration > Travel > Travel System Admin** and access the desired client Travel configuration.

NOTE: Depending on your permissions, the page may appear immediately after you click **Administration** or Travel.

2. In the Rail Connectors section of the travel configuration page, locate UK Rail [Trainline].

3. Complete the appropriate fields.

Field	Required?	Description / Action
Enable	Required	Select this checkbox.
Corporate Reference OR External Corporate Reference	Required	<p>New clients should use Corporate Reference field to insert the corporate reference.</p> <p>Migrated clients will see the corporate reference that they used for the previous connection filled in the External Corporate Reference field.</p> <p>NOTE: If both values are entered, the Corporate Reference will take precedence.</p> <p>In case of any update to the Corporate Reference or External Corporate Reference, save your changes and access the travel configuration again to review MI Questions mapping by clicking Configure Trainline.</p> <p>MI Questions mapping will be lost when the corporate reference is changed and will need to be set up again.</p>
Account Number	Required* Optional	<p>Clients having one account number should enter it in the Account Number field. The Account Number is sent to Trainline as Account Name.</p> <p>*For migrated clients who were using the Account Number field with the legacy API, the account number remains required.</p> <p>NOTE: Clients having more than one account number should create a custom field and map it to the appropriate Trainline question under the Configure Trainline button. If the client using the Account Number value wants to set up a custom field for the Account Name instead, they must delete the Account Number value from the UK Rail (Trainline) configuration settings first and then save changes. Next, to access the travel configuration again, open Trainline MI Questions by clicking Configure Trainline and map the Trainline Account Name to their custom field created for this purpose to complete.</p>
Connection Environment	Required	Select Production. (TEST and MOCK environments are for internal use only)

! **Important:** Use **Configure Trainline** to map Concur Travel custom fields to Trainline custom fields. To prevent any issues during the booking flow, make sure that the custom fields' values set up in Concur Travel correspond to requirements set up with Trainline. Any discrepancy might lead to booking failures for users.

PROFESSIONAL EDITION – CLIENT AGREEMENT

Customers based in the UK using a Travel Management Company (TMC) that is also based in the UK, do not need to sign a commercial agreement with Trainline. However, an agreement between Trainline and their TMC is required.

TMCs based in the UK need to have a contract with Trainline to be able to fulfill tickets booked for UK Rail.

TMCs based outside of the UK need to have an international license-to fulfill UK Rail tickets. If the TMC does not have an international license and the client would like to book UK Rail from outside of the UK, the client should contact Trainline directly as the direct contract with Trainline would be required in such a case.

NOTE: A support case must be opened if a TMC does not support Trainline via Concur Travel but plans to in the future. The tenant ID needs to be added by SAP Concur before enabling the UK Rail (Trainline) connector for clients.

	TSGs	Renfe Direct Connect Travel Service Guide, Lowest Logical Fare (LLF) / Benchmark Lowest Airfare
	Fact Sheets	
	Admin Guides	
	Other	Travel Services Help

Overview

With the release between April 8 and April 10, Concur Travel introduces the support of the Least Cost Logical Fare (LLF) for Renfe rail bookings in the new Concur Travel experience.

USER/CUSTOMER BENEFIT

The calculation of the Least Cost Logical Fare (LLF) is based on criteria and travel policy rules set by the company administrator. These options are highlighted as the best choices for the users to select during the train search.

End-User Experience

If configured, Concur Travel calculates the Least Cost Logical Fare (LLF) based on criteria defined by the customer. LLFs are identified on the **Search** results page with a star icon. If configured, LLF will display per class of service. The same icon is used for all classes of service.

The LLF is also visible with the same icon in the **Train Options Turned Down** list to both the user and the approver.

Configuration for Professional Travel

Least Cost Logical Fare is calculated for Rail only if the **Include Rail** setting in the LLF calculation definition is set to **Yes**. Administrators can make this change by going to the **Travel Policy Administration** page and editing **Flight** travel policy rules.

LLF per fare class of service is a new LLF configuration only applicable to the new Concur Travel experience. The new configuration enables administrators to have a Least Cost Logical Fare per class of service. This is different than the current system where the LLF is always in the lowest class of service that is available in the search results.

Please define your Lowest Logical Fare (LLF):

- Refundability: Does Not Matter
- Airport: Does Not Matter
- Run Dedicated LLF Shop:
- LLF per fare class of service (New Concur Travel Experience only):
- Has Contract: Does Not Matter
- Number of Stops: Does Not Matter
- Time Window: Does Not Matter
- Include Rail: No

Limitations

Delayed LLF calculation configuration on **Company Travel Configuration** page:

- Enforce LLF based on user's chosen fare:** Initially, the display of additional screen will not be supported. This functionality may be added later. A banner message will display at the top of the **Search Results** page that will read: "Additional policy will be calculated based on the time of your selected fare". Delayed LLF will be calculated after the user has selected their fare (for example, if return fares are chosen after the selection of an inbound fare), and all fares will be evaluated against any delayed LLF based travel policy rules. Users will see all policy rule violations on the **Review and Book** page for the moment, this may be revised in the future.

- Enforce LLF based on user's chosen fare

- Show additional LLF screen if the user's chosen fare is out of policy
- The LLF screen display the user's chosen fare and the LLF option(s)

- Enforce LLF based on hybrid:** Initially, Hybrid LLF is calculated based on the search window. Additional search options triggering calculation based on a user's search are not yet supported.

The Run Dedicated LLF Shop LLF configuration option is not supported in the new Concur Travel experience due to changes in the overall search process.

Mark LLF fare/s with icon LLF configuration option is no longer supported in the new Concur Travel experience. The icon will always display.

NOTE: Travel administrators for configurations where Renfe rail connectors are enabled and who set LLF criteria for Rail should revisit their current LLF related policy rules to ensure rules are configured correctly for their needs.

All configuration settings are applied for both Flight and Rail bookings if LLF is enabled for Rail.

	Other		

Overview

Sabre is decommissioning their legacy **5-Remarks Form of Payment Field** (5-*VI4443332222111¥05/26) as of Q3 2024. All Sabre customers are required to migrate to Sabre’s Enhanced Form of Payment also known as **FOP Wallet (*FOP)**. For compliance, Sabre is also anonymizing and removing credit card data from all non-compliant fields in the PNR. They are rolling this anonymization and removal process out in phases, with the final phase to be completed by December 2024. This change will also require a new process for sending credit card data to back-office systems.

Please refer to the following Sabre SAN messages for more details:

- SAN 16643 - Sunset of PNR Form of Payment Field 5-Remarks
- SAN 16331 - Payment Card Anonymization & Removal in PNR Fields
- SAN 17007 - Form of Payment Wallet (FOP) New Use Type for Interface Records
- SAN 17009 - Interface User Record (IUR) - New MX Record for Form of Payment Wallet

Concur Travel will migrate to the FOP Wallet in preparation for this mandate.

USER/CUSTOMER BENEFIT

Concur Travel will add the company default or traveler-selected form of payment chosen at the time of booking for every reservation type (Flight, Car, Hotel, and Rail) to the FOP Wallet in the Sabre PNR along with the appropriate Use Type code, for example, UAL=Air, UCR=CAR, UHL=Hotel, and URL=Rail.

NOTE: During this transition period, Concur Travel will also continue to add the Air and Rail FOP in the legacy format without a **Use Type** code to support existing mid-office processes. This applies only to PNRs with a live Air and Rail GDS reservation.

End-User Experience

Example: FOP Wallet

```
*FOP<
-----
FORM OF PAYMENT
 1. PAYMENT CARD TYPE
    *VI4111111111111111/0528      XN
 2. PAYMENT CARD TYPE
    VI4111111111111111/0528      XN
                                     UAL
 3. PAYMENT CARD TYPE
    CA5122291189070573/1024      XN
                                     UCR
 4. PAYMENT CARD TYPE
    AX373083796598998/1224      XN
                                     UHL
-----
```

Configuration for Professional and Standard Travel

This feature requires that a default company form of payment be defined, or the form of payment must be selected by the traveler on the **Review and Reserve** page for every reservation type, in order to be added to the Sabre FOP Wallet.

For more information on setting FOP requirements, refer to the *Form of Payment Travel Service Guide*. To locate, refer to *Additional Release Notes and Other Technical Documentation* in these release notes.

Sabre customers must self-activate Passenger Name Association, which includes the FOP Wallet by using the TJR keyword PNAPNR.

! Once the TJR setting is activated, it cannot be deactivated.

The form of payment updates will automatically be enabled by default in Concur Travel. If a Sabre customer has not yet activated the FOP Wallet, then Concur Travel will automatically revert to the legacy FOP field prior to Sabre's activation deadline.

For more information, refer to the *Form of Payment Travel Service Guide*.

Refer to the following Sabre SAN notifications:

- ◆ SAN 16643 - Sunset of PNR Form of Payment Field 5-Remarks
- ◆ SAN 16331 - Payment Card Anonymization & Removal in PNR Fields
- ◆ SAN 17007 - Form of Payment Wallet (FOP) New Use Type for Interface Records
- ◆ SAN 17009 - Interface User Record (IUR) - New MX Record for Form of Payment Wallet

New Concur Travel Experience: TMC Self-Service Report Enhancement for Client Opt Out Status (Professional Edition Only)

Overview

Targeted for the May release, Concur Travel will add a filter to the Flight experience that sorts results based on CO2 emissions. This allows users to make more sustainable choices.

End-User Experience

When booking flights, the user will be able to filter out results based on CO2 emissions. With a sliding filter, the user can adjust the results based on the emissions that they find acceptable.

When filtering results, the user will adjust the filter under **Emissions** to return more sustainable flights.

Configuration for Professional Travel

This feature will be enabled by default. There are no configuration steps.

****Planned Changes** New Concur Travel Experience: EDIFACT and NDC Content for Amadeus (Professional Edition Only)**

Information First Published	Information Last Modified	Feature Target Release Date
April 12, 2024	--	June 21, 2024
Any changes since the previous monthly release are highlighted in yellow in this release note.

	Other		

Overview

In an upcoming release, Amadeus EDIFACT and NDC will be enabled as the content source for Amadeus customers. The following is targeted for inclusion from the following airlines via Amadeus NDC:

- American Airlines
- United Airlines
- Air France
- KLM Royal Dutch Airlines.

Other airlines through Amadeus NDC will be supported in the future releases.

Configuration for Professional Travel

A setting is required so administrators can enable or disable the NDC shopping and booking flow in the new Concur Travel Experience through a GDS. In Amadeus, the Office ID and IATA number must first be activated for an individual airline’s NDC. Then the toggle can be turned on to enable the NDC content source for flight shopping and booking.

This new setting will be added to Amadeus customers' Travel Configuration page, providing the ability to enable NDC content through a GDS. While this setting will only be applicable for Flight searching and booking in the new Concur Travel experience, the toggle will appear for all Amadeus configurations.

Planned Changes New Concur Travel Experience: Add Vendor Preference and Corporate Rate to Post Booking Flow (Professional Edition Only)

Overview

Targeted for a future release, Concur Travel plans to display the **Corporate Rate** label and **Preferred Vendor** label for Flight. These changes will be visible on the **Review and Book, Finalize** and **Trip Overview** pages. These labels will also display on e-mails received once a booking is finalized.

USER/CUSTOMER BENEFIT

This change is being made to remind the user which type of rates and vendors were booked, and it will provide a more consistent user experience across the booking process.

End-User Experience

Once the search for flights is completed, the user will then see the **Corporate Rate** and **Preferred Vendor** labels on the last pages of the booking flow and in the post booking e-mails received. These labels will appear on the **Review and Book**, **Finalize** and **Trip Overview** pages.

Configuration for Professional Travel

This feature is enabled by default. There are no configuration steps.

Hotel****Planned Changes** New CSL Segment Format for Sabre Hotels**

Overview

SAP Concur completed development to support Sabre's Content Service for Lodging (CSL) platform in 2021. Since that time Concur has continued to create the legacy segment for Sabre bookings using an indicator in the Enhanced Hotel Book API "bookGDSviaCSL=False". This is to support those customers whose third-party mid and back-office systems were not yet able to process the CSL HHX segment type that is generated in the Sabre Interface User Record (IUR) file, which supports travel agency back-office functions for Ticketing, Invoicing, and Itinerary type entries.

Sabre's latest CSL update via SAN 16384 states that Sabre will require all hotel bookings to be created using the new CSL hotel segment as of **May 31, 2024**. Please refer to Sabre SAN 16384 for complete details.

Concur Travel is ready for this change and will continue to be able to modify and cancel both legacy hotel segments as well as the new CSL hotel segment type from **May 31**. The API flag "bookGDSviaCSL" will continue to be set to "False" which means that starting March 26, 2024, hotel bookings will be created using the new CSL segment type, but the legacy IUR format will be sent for back-office processing.

Sabre has not indicated when the legacy IUR will be sunset, so whilst some customers will continue to use this for the foreseeable future, other Concur Travel customers may be ready to migrate to the new CSL HHX IUR segment type. As Concur Travel does not have visibility into which customers have migrated, a new Agency Configuration setting is being introduced so clients who want to use the new CSL IUR format can do so. This new configuration setting will be called **Create Content Services for Lodging Interface User Record (IUR)**.

The default for this setting is unchecked which means the legacy IUR will continue to be created.

NOTE: This setting only applies to users working with the new Concur Travel experience. Customers using the current OBT platform will not be able to use the new IUR.

TMC Experience

TMCs will see the new configuration setting, **Create Content Services for Lodging Interface User Record (IUR)**.

If the customer wants to create a new IUR record, they will need to update the new configuration setting for this.

For more information, refer to the *Concur Travel Client Fact Sheet – Sabre Content Services for Lodging*.

Overview

Recently, SAP Concur released the new Hotel booking experience for customers connected to Sabre and for customers connected to one of our participating Custom Hotel Source (CHS) providers. With this integration, customers can experience:

- An intuitive and personalized design, with an easy-to-use interface.
- Seamless content normalization, aggregation, and servicing.
- Mobile and web content parity.

USER/CUSTOMER BENEFIT

The new Concur Travel Hotel booking experience offers a specific feature set for customers.

- **Time Savings:** The booking workflow will be streamlined so fewer steps are required.
- **Omni search:** Once the user enters the first few characters of their search criteria, the system will update to provide a list of suggested options from which the user can select.

- **Sustainability:** Property information will include the sustainability certifications or programs to which the property belongs, a sustainability score, and carbon emissions data. Additional property filter options will include electric car charging stations and sustainability certifications to help users make more sustainable choices. Users will be able to sort properties based on their sustainability score and emissions.
- **Search results with lead rate:** The property search results will be presented with one lead rate so the user can quickly compare the lowest rate available at multiple properties.
- **Hotel Details:** A list of the rates available at a specific property, together with cancellation policy details, room amenities and images, will be available to the user.

Configuration for Professional Travel

CUSTOM HOTEL SOURCE PROVIDERS

For customers interested in using Custom Hotel Source providers as their source for hotel content, re-enablement is required.

▶ **To configure:**

1. Click **Administration > Travel** (on the sub-menu) > **Travel System Admin** and select the desired client travel configuration.

NOTE: Depending on your permissions, the page may appear immediately after you click **Administration** or **Travel**.

There are now two different Hotel Connector sections of the Travel Configuration page. One is to support the new hotel connectors and is called Hotel Connectors – Hotel Service v4. The other is the existing hotel connector section.

2. When enabling a new connector, it is essential that any current direct connect remains enabled otherwise customers will not be able to make bookings in the current Concur Travel experience. This means that a current HSv2 configuration needs to remain enabled on HSv2, and on HSv4 once migrated. The HSv2 connection will not allow new bookings but will provide access to previously booked reservations for servicing. Any servicing will continue as it is today using the Online Booking Tool (OBT).
3. The administrator will be able to select the default connection type within the new section.

PASSIVE PNR FOR DIRECT CONTENT

► *To configure:*

1. Go to **Administration > Travel** (on the sub-menu) > **Travel System Admin** and select the desired client travel configuration.

NOTE: Depending on your permissions, the page may appear immediately after you click **Administration** or **Travel**.

2. On the **Travel Configuration** page, under **GDS PNR Options**, go to the activation checkboxes.
3. Under **Defaults for Specific non-GDS vendors**, select the **New Custom Hotel Source** checkbox. The default for this field is **Use the default specified above**. Select the **Write passive segments for non-GDS content if I have not specified a default for the specific vendor in the table below** checkbox.

TRAVEL ARRANGER FLOW

The Travel Arranger feature will be supported for Hotel.

For more information on how to book a hotel as a Travel Arranger, see the *Travel Arranger View Travel Service Guide*.

The **Travel Arranger Name** appears on the new **Trip Overview** page.

Miscellaneous

****Planned Changes** Share a Trip Via Microsoft Teams Integration**

Overview

Targeted for late April or May, for the Flight vertical, users will be able to share trips in Microsoft Teams. Once the SAP Concur app is installed by an administrator, users can select the app in their Teams conversation.

NOTE: To make this feature available in the Microsoft Teams store, it must first be reviewed and approved by Microsoft. After it is approved, an update will be published in next month’s release notes.

When used for the first time or after their session expires, users will be prompted to log in via single sign-on (SSO) or by entering their username and password.

NOTE: SAP Concur is investigating an issue that occurs when logging in via SSO with a link sent to the user's inbox.

Trips will then be automatically synced. Teams chat recipient participants can click the **Book this trip in SAP Concur** button that will re-direct them to Concur Travel where they can book a similar trip. The same trip destination will display, but the departure airport will reflect the one that is specified in their profile.

End-User Experience

Example: Teams Chat window with Concur Travel shared itinerary, trip search, and trip booking functionality

Example: Book this trip in SAP Concur.

	Other	

Overview

Targeted for release May 17, there will be changes to the **Online Order Form**. New fields will be available, while one is removed.

USER/CUSTOMER BENEFIT

This change is being initiated to support options that are billable to the client. It also ensures consistency between the order form and the Reseller Price List.

End-User Experience

The **Online Order Form** will be adjusted to allow for changes including new fields.

The **Enable TripLink** checkbox will be removed and will longer be available.

If a user chooses **New Professional Client** or **New Standard Client**, the **Additional Comments** input box will appear and will be retitled to **Additional Comments (Include implementation country)**.

The screenshot shows a 'Feature Options' section with several checkboxes. The 'Additional Comments (Include implementation country)' field is present and empty. Below the field are 'Save', 'Save and Clone', and 'Cancel' buttons. A blue information bar at the bottom states: 'Once a new company is created, these fields are purely informational and can be changed only from within company administration for that company.'

Under **Feature Options** there will be a new checkbox to enable **New Tier2 for Host Agency \$\$\$**.

This screenshot shows the 'Feature Options' section with a new checkbox, 'New Tier2 for Host Agency \$\$\$', added to the list of options. Other checkboxes remain the same as in the previous screenshot.

When **Modify Existing Client > Agency Conversion – Incoming Agency** is selected, a new checkbox appears, titled **GDS/PCC Conversion (no agency change) \$\$\$**.

The screenshot shows the 'Online Order Form' header. Below it, the 'Modification Requested' dropdown menu is set to 'Agency Conversion - Incoming Agency'. Other dropdowns for 'Order Type' and 'Submitted by' are also visible.

This screenshot shows the 'Feature Options' section with a new checkbox, 'GDS/PCC Conversion (no agency change) \$\$\$', highlighted with a red box. This checkbox is only visible when the 'Agency Conversion - Incoming Agency' option is selected in the form above.

If a user chooses **Modify Existing Client > Add Config to Existing Professional Site** or **Modify Existing Client > Add Config to Existing Standard Site**, two new checkboxes will appear. These are:

- **New GDS (assumes standard finishing) \$\$\$**
- **Additional Country \$\$\$** (this checkbox is accompanied by a dropdown list, where a country is selected).

Feature Options

Overview

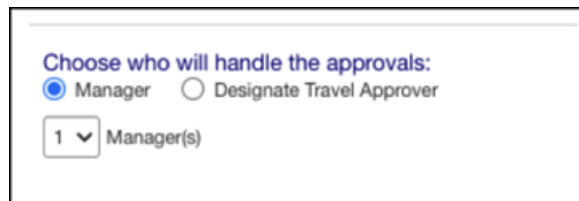

Targeted for a future release in the legacy Concur Travel experience, the two-manager approval flow will no longer be supported. In the legacy Concur Travel experience, all clients with a two-manager approval flow will be migrated to a one manager approval flow.

USER/CUSTOMER BENEFIT

This change is being initiated to simplify and streamline the approval flow in the legacy Concur Travel experience. It also provides more options when working with Concur Request.

End-User Experience

When choosing an approver, the user will only be able to request the approval flow be directed to one manager and not two.

Choose who will handle the approvals:

Manager Designate Travel Approver

1 ▼ Manager(s)

	Other		

Overview

Concur Travel is removing the **Agency Processing Fee Form of Payment for Land Only/Non-GDS Reservations** configuration setting from **Travel Configurations**. Any credit card data that is stored in these fields will be removed.

USER/CUSTOMER BENEFIT

The GDS are making changes to the way credit cards are entered into the Passenger Name Record (PNR), resulting in several changes needed within Concur Travel. Form of payment (FOP) will need to be written in a specific format, depending on its use. This means that all FOP features require updating and reformatting. Based on these changes, SAP Concur is recommending that customers and TMCs work together on how to manage TMC service fees outside of the booking process. One benefit to this change is the avoidance of PNR template updates for a process that has no impact to the online booking process.

End-User Experience

The previous setting will be removed from the **Travel Configurations** page and will no longer be visible. Configurations using the following options will have the setting automatically changed to **Always write user selected card (default)**:

- **Always write user selected air/rail card**
- **Always write air/rail ghost card**
- **Always write air/rail profiled card**
- **Always use this card**
- **None**

NOTE: Depending on the customer configuration settings, the user-selected FOP will be added to Amadeus, Apollo, Worldspan, and Travelport+ PNRs. For Sabre bookings, see the ****Planned Changes** Sabre Enhanced Form of Payment (FOP Wallet)** in this document for Sabre specific FOP handling.

Configuration for Professional Travel

This feature is enabled by default. There are no configuration steps.

Overview

Targeted for the July release, Concur Travel intends to release additional elements to the Sabre Rental Car experience. The elements that will be added are **Flight Information** and **Loyalty ID**.

USER/CUSTOMER BENEFIT

SAP Concur wants to enhance the new Concur Travel experience for the end user by adding new elements.

End-User Experience

With the July release, the following will be added:

- **Flight Information:** This is being added so the traveler’s arrival details can be provided to the rental car partners.
- **Loyalty ID:** To ensure that loyalty incentives are received, loyalty information will be added to the segment (ID-⌘XX). Sabre hides this information.

Example:

```

Overview

The GDS systems are changing how credit cards are managed in Passenger Name Records (PNRs), resulting in several changes needed within Concur Travel. One of the GDS-imposed changes is the anonymization and removal of credit card data in all areas of the PNR except for the designated **Form of Payment** (FOP) field or FOP Wallet. In preparation for this change, Concur Travel will be decommissioning **Profile and PNR Finishing Template** datapoints for credit card numbers and expiration dates.

SABRE

- Profile Templates are not applicable to Sabre customers. Concur Travel securely synchronizes credit card data from the Concur profile to Sabre Profiles using Sabre Web Services today.
- Concur Travel will be migrating to Sabre's Enhanced Form of Payment (FOP Wallet) and will be adding the company default or traveler-selected form of payment for each booking type to the FOP Wallet (*FOP) along with the applicable Use Type code. Refer to the ***Planned Changes** Sabre Enhanced Form of Payment (FOP Wallet)* release note in this document for more information.
- Concur Travel will be decommissioning Sabre **PNR Finishing Template** datapoints for credit card numbers and expiration dates in December 2024. It is important to note this is the final extension of this feature. SAP Concur will retire this functionality in December 2024.

AMADEUS AND TRAVELPORT

- Concur Travel will continue to transmit the user-selected credit card to the compliant form of payment field already in place in the PNR today.
- Concur Travel will be decommissioning Amadeus, Apollo, Travelport+ and Worldspan **Profile Template** datapoints for credit card numbers and expiration dates in December 2024. It is important to note this is the final extension of this feature. SAP Concur will retire this functionality in December 2024. Concur Travel will be decommissioning Amadeus, Apollo, Travelport+ and Worldspan **PNR Finishing Template** datapoints for credit card numbers and expiration dates in December 2024. It is important to note this is the final extension of this feature. SAP Concur will retire this functionality in December 2024.
- Concur Travel strongly recommends using the Travel Profile API for synchronizing Concur profile data with your GDS profiles. For more information, refer to the *Travel Profile v2 API* documentation in the [SAP Concur Developer Center](#).
- SAP Concur is working closely with our GDS partners to ensure Concur Travel is utilizing the latest and most secure credit card processing for travel reservations.

! Due to the highly customizable nature of PNR Finishing Templates, Concur Travel can only provide general guidance for making updates and cannot ensure that finishing will run successfully if these datapoints are not removed before their retirement.

USER/CUSTOMER BENEFIT

SAP Concur sees this as one of the first of many industry-wide efforts to better secure sensitive user data, creating higher confidence in the travel purchasing process and reducing financial risk for users and companies alike.

SAP Concur is recommending that customers and TMCs work together to identify any scenarios where the Profile or PNR Finishing templates are used to transmit credit card data to the GDS systems in non-compliant fields of the GDS profile and/or PNR. Customers who need credit card data transmitted to the IUR/A.I.R./MIR file for back-office processing will need to seek a mid-office solution to address their needs.

End-User Experience

The following datapoint examples should help TMCs and customers determine if changes are needed to their Concur Travel instance.

PROFILE TEMPLATE DATAPPOINT EXAMPLES

The following is a list of profile template datapoints which include credit card numbers or expiration dates; this list may not be comprehensive. TMCs and customers should review their Profile Templates. If templates are using one of the credit card elements, these should be removed:

- Air_credit_card_number car_credit_card_number
- ghost_air_credit_card_number
- ghost_car_credit_card_number
- ghost_hotel_credit_card_number
- hotel_credit_card_number
- personal_air_credit_card_number
- personal_car_credit_card_number
- personal_hotel_credit_card_number
- car_expiration_date
- ghost_air_expiration_date
- ghost_car_expiration_date
- ghost_card_expiration
- ghost_card_number
- ghost_hotel_expiration_date
- hotel_expiration_date
- personal_air_expiration_date
- personal_car_expiration_date
- personal_hotel_expiration_date
- ycal_ghost_card_expiration
- ycal_ghost_card_number

Example of a Profile Template line configured to transmit a credit card number:

Overview

SAP Concur plans to add Price Quote (PQ) modifiers into the new Concur Travel experience process for accuracy purposes.

USER/CUSTOMER BENEFIT

This change will be implemented to enhance accuracy and reduce price jump situations such that the stored price always matches the price offered in the shopping response.

End-User Experience

When storing the price quote, the following qualifiers will be added:

- **XO** (forced passenger type to avoid shifting to ADT when not using ADT),
- **P**(passenger type),
- **A** (validating carrier) and
- **ZZ** (fare basis)

In addition, SAP Concur will change the SNAP code qualifier from I to AC*.

Configuration for Professional Travel

This feature is enabled by default. There are no configuration steps.

Additional Release Notes and Other Technical Documentation

Online Help

You can access release notes, setup guides, user guides, admin summaries, supported configurations, and other resources via the in-product Help menu or directly on the SAP Help Portal.

To access the full set of documentation for your product, use the links in the SAP Concur **Help** menu, or visit the [SAP Concur solutions page](#).

SAP Concur Support Portal – Selected Users

Access release notes, webinars, and other technical documentation on the SAP Concur support portal.

If you have the required permissions, **Contact Support** is available on the SAP Concur **Help** menu and in the SAP Concur page footer.

Click **Contact Support** to access the SAP Concur support portal, then click **Resources**.

- Click Release/Tech Info for release notes, technical documents, etc.
- Click Webinars for recorded and live webinars.
